OKLAHOMA, Panhandle

(OK-Z001) CIMARRON, (OK-Z002) TEXAS, (OK-Z003) BEAVER 02/08/11 09:00 CST 0 Heavy Snow 02/09/11 12:00 CST 0

An upper level low moved east from the four corners region and across the Oklahoma Panhandle. A strong arctic cold front moved through the Oklahoma Panhandle which, along with the upper level low, produced heavy snowfall and strong winds which resulted in whiteout conditions across all of the Oklahoma Panhandle. Snowfall amounts ranged from two to five inches across the western and central Oklahoma Panhandle to between six and eight inches across the eastern Oklahoma Panhandle. The northeast corner of Beaver County, north and east of Gate Oklahoma, received two to three foot snow drifts. No damages or injuries were reported.

TEXAS, North Panhandle

An upper level low moved east out of the four corners region and across the Texas Panhandle. A strong arctic cold front pushed through the Texas Panhandle which, along with the upper low, combined to produce heavy snow and whiteout to near whiteout conditions across all of the Texas Panhandle due to strong winds and blowing snow. The visibility in most locations was reported to be near a quarter of a mile or less. A high wind gust occurred at the Dumas Texas AWOS station located three miles west of Dumas Texas. Blizzard conditions occurred over the south central Texas Panhandle. Snowfall amounts ranged from around two to four inches across much of the western Texas Panhandle to around ten to twelve inches across the eastern Texas Panhandle. The snow was very difficult to accurately measure due to the strong winds which resulted in the blowing and drifting of the snow. Snow drifts were reported to be around one to two feet. No damages or injuries were reported.

The Texas Forest Service reported that the Higgins Wildfire began one mile west of Higgins Texas in Lipscomb County around 1439 CST. The Texas Forest Service along with the Texas Department of Public Safety reported that the wildfire burned a measured five thousand three hundred and eight acres which was mapped using GPS. The wildfire was contained at 1958 CST and no damage or injuries have been initially reported. However, some structures were threatened but were saved.

The Texas Forest Service reported that the FM3260 Wildfire began six miles north of Lipscomb Texas in Lipscomb County around 1439 CST. The Texas Forest Service along with the Texas Department of Public Safety reported that the wildfire consumed a measured ten thousand and six hundred acres which was mapped using GPS. The wildfire threatened five homes, however none were damaged or destroyed. The FM3260 Wildfire was contained at 1957 CST.

Both the Higgins Wildfire and the FM3260 Wildfire were combined into the Lipscomb County Complex with a total acreage burned of fifteen thousand nine hundred and eight acres. There were no injuries or damages reported.
