Wind gusts peaked at 62 mph as measured by the Oklahoma Mesonet 8 miles west of Slapout. 10 minutes prior, winds reached severe criteria with gusts to 58 mph.

Thunderstorms with damaging wind gusts and hail developed across the central and eastern portions of the Oklahoma Panhandle during the afternoon and evening of the 7th. The most significant event occurred just northwest of Guymon where strong winds estimated to be around 75 mph caused a trailer home to be blown off of its foundation. No injuries were reported.

DALLAM COUNTY 2.9 WNW KERRICK [36.49,	-102.27]			
	06/04/15 17:35 CST		0	Hail (1.25 in)
	06/04/15 17:35 CST		0	Source: Public

Half dollar size hail was reported in Kerrick, 15 miles northwest of Stratford.

Flooding was the most significant impact from the thunderstorms which developed during the afternoon of the 4th, particularly in Hartley County. All hail reports from this particular storm were sub-severe and no larger than nickel size, although larger hail may have occurred over rural areas that this thunderstorm moved over. This storm did produce damaging wind gusts. Hail as large as half dollars was reported further north with the storms that affected the Kerrick area in Dallam County.

Power pole damaged by strong thunderstorm wind gusts just southeast of Hartley.

# HARTLEY COUNTY --- 6.3 E HARTLEY [35.86, -102.29], 7.2 SSE HARTLEY [35.79, -102.34], 2.2 S HARTLEY [35.85, -102.41], 2.0 N HARTLEY [35.91, -102.40]

06/04/15 19:16 CST	0	Flash Flood (due to Heavy Rain)
06/05/15 07:00 CST	0	Source: Law Enforcement

A storm chaser reported that Highway 385 on the south side of Hartley was closed. Water was completely over the road and up to the wheel wells of tractor trailers. One car was stalled due to the flood waters. Approximately two hours later, just after 10:00 PM CDT, law enforcement reported that the water was still high on Highway 385 and it remained closed. Flooding extended northward into Hartley and resulted inn barricaded roads in town. Flood waters slowly subsided overnight and the Sheriff's Office reported that the Highway reopened shortly after 5:00 AM CDT. As of 6:30 AM CDT, a storm spotter reported that water was still flowing across Farm-to-Market 998 south of Hartley.

Slow moving thunderstorms developed during the afternoon over the northwestern Texas Panhandle and resulted in strong winds, hail and flooding. The most impactful weather was from flooding. A CO-OP Observer 1 mile southeast of Hartley reported a total of 5.05 inches of rain and locally higher amounts were indicated by radar rainfall estimates over portions of eastern Hartley County. This resulted in flooding including the closure of Highway 385 just south of Hartley.

	06/12/15 00:08 CST		0	Source: Fire Department/Rescue

Nickel to quarter size hail was reported in Skellytown.

Thunderstorms brought large hail to portions of the Texas Panhandle. Hailstones as big as baseballs fell near Gruver and were reported by more than one source to be the shape of a disc. This storm tracked eastward into Ochiltree County producing quarter size hail near Farnsworth and Wolf Creek Park. Other locations that experienced hail that was at least quarter size include; just south of Boys Ranch, just east of Dalhart, and eastern Sherman County.

Hail slightly larger than golf balls was observed by storm chasers. Photo taken by Marcus Diaz.

The KVII School Net site located 3 miles east of Bushland measured persistent wind gusts between 70 and 80 mph as the thunderstorm moved through. A peak wind of 93 mph was measured at 6:35 PM CDT. This instrument has a history of exaggerated wind gusts and the true value was probably around 85 mph based an assessment of surrounding observations, damage reports and radar data.

DEAF SMITH COUNTY 7.0 N BOOTLEG [34.93, -102.81]					
06/14/15 19:28 CST	0	Thunderstorm Wind (MG 74 kt)			
06/14/15 19:28 CST	0	Source: Broadcast Media			

The KVII School Net site located 7 miles north of Bootleg at Walcott School measured a wind gust of 85 mph. Emergency management found damage at this location. A roof of an outbuilding was blown 300 feet and wrapped around a pickup truck.

Thunderstorms developed across the Texas Panhandle during the afternoon of the 14th and produced strong winds and hail. The most intense thunderstorm moved north from the Friona area into Deaf Smith County and produced a wind gust to 73 mph near Hereford. This thunderstorm continued to move northeast toward Bushland and Amarillo and resulted in wind damage. In Bushland, fences were blown down, garage doors were blown in, and a dumpster was flipped over. Wind gusts to around 80 mph were common along the storms path into west Amarillo. In Amarillo winds of at least 60 to 70 mph resulted in trees being blown down and one roof blown off.

Damage to a wooden fence in Bushland from thunderstorm winds as high as 80 mph.
