04/16/16 11:15 CST	0	Flash Flood (due to Heavy Rain)
04/16/16 15:15 CST	0	Source: Emergency Manager

Heavy rain overnight caused flooding across western portions of Texas County . The flooding increased as rain persisted through early afternoon. Some county roads were closed due to flowing water.

A vigorous low pressure system produced supercell thunderstorms across the western Oklahoma Panhandle during the afternoon and evening of April 15th. Four separate brief tornadoes were reported by spotters and also documented through video by storm chasers across Texas County, in the vicinity of Eva. Two produced damage consistent with EF-0 and EF-1 on the Fujita scale. Several reports of large hail were received.

Hail between the size of quarters and ping pong balls fell near Lelia Lake.

A second day of severe weather brought hail to southern portions of the Texas Panhandle, including significant hail accumulation near Lelia Lake southeast of Clarendon. Reports of hail to near the size of golf balls were received in southern Donley County.

Quarter size hail was reported in Texhoma.

Thunderstorms formed in the western Texas Panhandle during the afternoon of the 28th and moved east across the Texas Panhandle through the afternoon and evening hours. The storms occurred in an environment characterized by sufficient shear and instability to allow them to become severe. Several locations that were impacted by these storms received large hail. Isolated strong damaging winds were reported. The largest hail broke windshields south of Perryton, and was near 2" in diameter.
