Low pressure moving from Montana, across South Dakota, and into the Upper Mississippi Valley brought severe winter weather to parts of west and south central North Dakota on the 8th and 9th. Up to eight inches of snow fell over McKenzie County and southern Morton County. Over the southern James River Basin of North Dakota snowfall up to six inches combined with winds gusting over 40 miles per hour to create blizzard conditions during the evening of the 8th into the morning hours of the 9th.
