Up to 7.12 inches of rain fell in Hartselle as reported by a CoCoRaHS observer. Resulting runoff produced extensive stream and creek flooding in the Hartselle community. In many locations in the downtown area, water of 2 to 4 feet in depth was reported inundating businesses. Several roads were washed out in the Hartselle area, including Rice Road, Celia Drive, Rustic Lane, and a public street near Westwood Drive. Eighty tons of rocks were used to repair one lane on Celia Drive.

Many roads were washed out near area streams, creeks and some river branches. Over 1 million dollars worth of damage was estimated to have occurred by city officials. Also, in the Somerville area, flooding closed roads.

**A strong storm system brought flooding rainfall across much of northern Alabama and portions of southern middle Tennessee. Rainfall amounts of 2 to 4 inches were common, with some areas receiving 5 to 7 inches. This produced widespread and extensive flash flooding and river/creek flooding, particularly in Morgan, Madison, and Jackson counties.**

**A strong low level jet and some instability also set the stage for damaging thunderstorm winds. Wind gusts up to 70 mph occurred in portions of Madison and DeKalb counties.**
