Numerous trees were blown down between Detroit and Sulligent.				
<b>FAYETTE COUNTY --- 3.9 WSW GLEN ALLEN [33.89, -87.81]</b>				
	04/04/14 04:00 CST	0		Thunderstorm Wind (EG 50 kt)
	04/04/14 04:00 CST	0		Source: Emergency Manager
Trees were blown down along County Road 49, south of Winfield.				
<p><b>During the early morning hours on Friday, April 4, a quasi-linear convective system (QLCS) moved into northwest Central Alabama ahead of a cold front. Although instability and wind shear due to an increasing low level jet were high enough to support severe storms, the QLCS weakened quickly as it entered the area as mid and upper level support pulled away from the area. Isolated wind damage was reported in Lamar and Fayette counties. The weakened line of thunderstorms continued to move across Central Alabama producing no other damage.</b></p>				
<b>MARENGO COUNTY --- 1.4 S MYRTLEWOOD [32.25, -87.95]</b>				
	04/06/14 16:14 CST	0		Hail (0.75 in)
	04/06/14 16:14 CST	0		Source: Emergency Manager
<b>MARENGO COUNTY --- 0.6 WSW HUGO [32.27, -87.69]</b>				
	04/06/14 16:28 CST	0		Thunderstorm Wind (EG 60 kt)
	04/06/14 16:28 CST	0		Source: Public
Large trees were reported down in the Hugo community.				
<b>PICKENS COUNTY --- 0.3 ESE CUNNINGHAM [33.15, -88.12]</b>				
	04/06/14 19:55 CST	0		Thunderstorm Wind (EG 50 kt)
	04/06/14 19:55 CST	0		Source: Emergency Manager
Several large trees were blown down along Alabama Highway 17 between Aliceville and Carrolton.				
<b>PICKENS COUNTY --- 0.9 NE BENEVOLA [33.11, -87.96]</b>				
	04/06/14 20:14 CST	0		Thunderstorm Wind (EG 50 kt)
	04/06/14 20:14 CST	0		Source: Emergency Manager
A chicken house was destroyed and another was damaged near Benevola. In addition, one barn was damaged.				
<b>TUSCALOOSA COUNTY --- 1.1 ENE BUHL [33.26, -87.75]</b>				
	04/06/14 20:20 CST	0		Thunderstorm Wind (EG 60 kt)
	04/06/14 20:20 CST	0		Source: Emergency Manager
In the Buhl and Elrod communities, numerous trees and powerlines were blown down along U.S. Highway 82 and County Road 140. In addition, several buildings in the surrounding area, including a church and at least two manufactured homes, sustained minor damage. One manufactured home sustained heavy damage from a fallen tree.				
<b>TUSCALOOSA COUNTY --- 3.0 NNE COKER [33.27, -87.68]</b>				
	04/06/14 20:25 CST	0		Thunderstorm Wind (EG 60 kt)
	04/06/14 20:25 CST	0		Source: Emergency Manager
Approximately 50 trees were uprooted or snapped along Upper Columbus Rd and near Lake Lurleen. Several buildings in the area sustained minor to moderate damage due to strong winds or falling trees. The steeple of a church was also blown down.				
<b>TUSCALOOSA COUNTY --- 5.1 NNE CLOVERDALE [33.30, -87.63]</b>				
	04/06/14 20:30 CST	0		Thunderstorm Wind (EG 50 kt)
	04/06/14 20:30 CST	0		Source: Emergency Manager

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Trees were blown down on Alabama Highway 171 near Tom Montgomery Rd.				
<b>TUSCALOOSA COUNTY --- 2.2 SE NEW LEXINGTON [33.55, -87.64], 3.3 NW KELLERMAN [33.37, -87.35], 4.1 N GREELEY [33.31, -87.14], 8.9 S DUNCANVILLE [32.92, -87.45], 1.8 S HULL [33.02, -87.62], 2.4 N FOSTERS [33.11, -87.71], 2.8 SSW COKER [33.19, -87.72], 7.0 W NEW LEXINGTON [33.55, -87.79]</b>				
	04/06/14 23:30 CST		0	Flash Flood (due to Heavy Rain)
	04/07/14 03:30 CST		0	Source: Emergency Manager
Widespread flash flooding occurred across portions of Tuscaloosa county , including the cities of Tuscaloosa, Northport, and Lake View. Four to five inches of rainfall caused water to flow across roadways and creeks to rise above bank full . Numerous roads were closed. Repairs to roadways, bridges, and debris removal totaled around \$750K.				
<b>SHELBY COUNTY --- 1.1 ESE WILTON [33.08, -86.86], 4.4 N LAY LAKE [33.16, -86.51], 1.5 WNW CRESWELL [33.34, -86.40], 4.3 NNE ARKWRIGHT [33.44, -86.35], 3.8 NW DUNAVANT [33.52, -86.60], 0.9 NE PARAMOUNT [33.33, -86.82], 0.8 NNW HELENA [33.31, -86.85], 2.2 WSW BRANTLEYVILLE [33.21, -86.92]</b>				
	04/07/14 00:15 CST		0	Flash Flood (due to Heavy Rain)
	04/07/14 06:00 CST		0	Source: Emergency Manager
Heavy rainfall moved over Shelby County for an extended period of time, resulting in widespread flash flooding as water flowed across roadways and creeks exceeded bank full. Highway 31 through Pelham and Alabaster, Highway 119 near Oak Mountain, Highway 280 in Chelsea, Highway 25 from Vandiver to Dunnington became impassable , as well as roads in other cities including Montevallo, Columbia and Harpersville. Buck Creek saw extreme rises and quickly came out of its bank in Alabaster . Parking lots along Highway 31 in Alabaster flooded, with cars partially underwater. Residents were evacuated from a mobile home park along highway 119 due to rising waters.				
<b>LAMAR COUNTY --- 2.2 WNW DETROIT [34.04, -88.21], 7.2 N BEAVERTON [34.03, -88.01], 2.9 S KENNEDY [33.54, -87.97], 8.0 W FERNBANK [33.53, -88.27]</b>				
	04/07/14 01:30 CST		0	Flash Flood (due to Heavy Rain)
	04/07/14 03:00 CST		0	Source: Emergency Manager
Two to three inches of heavy rainfall fell across Lamar County , resulting in many roads across the county becoming impassable due to water covering the roadway.				
<b>JEFFERSON COUNTY --- 0.9 ESE POWHATAN [33.58, -87.11], 0.9 SE DIXIANA [33.72, -86.67], 1.3 SW JEFFERSON PARK [33.54, -86.65], 1.1 NE PATTON CHAPLE [33.39, -86.82], 4.7 ESE KIMBREL [33.25, -86.99], 0.7 NW VALLEY CREEK [33.39, -87.08], 0.7 WNW SHORT CREEK [33.55, -87.11]</b>				
	04/07/14 02:15 CST		0	Flash Flood (due to Heavy Rain)
	04/07/14 04:40 CST		0	Source: Emergency Manager
An extended period of heavy rainfall led to widespread flash flooding across portions of Jefferson County . In addition to urban flooding, many roads became impassable as creeks and streams rose, including in Homewood, Tarrant, Pinson, Vestavia, and Birmingham. Five Mile Creek and Village Creek both rose above bank full, causing the surrounding areas to flood and roads to be barricaded. Shades Creek rose above bankfull resulting in the evacuation of an apartment complex in Homewood and a trailer park in Irondale. Several mudslides occurred, one resulting in the closing of Highway 31 through Homewood.				
<b>LAMAR COUNTY --- 2.1 W DETROIT [34.03, -88.21], 7.2 N BEAVERTON [34.03, -88.01], 2.8 S KENNEDY [33.54, -87.98], 7.9 W FERNBANK [33.54, -88.27]</b>				
	04/07/14 03:00 CST		0	Flood (due to Heavy Rain)
	04/08/14 07:00 CST		0	Source: Emergency Manager
After heavy rainfall ended, waters were slow to recede. Approximately 20 roads remained impassable until Tuesday morning, April 8th.				
<b>RANDOLPH COUNTY --- 1.3 NNW PINE HILL [33.47, -85.39], 2.0 S WOODLAND [33.34, -85.38], 1.2 E ROCKSLAND [33.22, -85.38], 4.1 SSW WADLEY [33.07, -85.58], 0.6 WSW DINGLER [33.33, -85.61], 3.1 SSW PINE TUCKEY [33.43, -85.54]</b>				
	04/07/14 03:07 CST		0	Flash Flood (due to Heavy Rain)
	04/07/14 08:30 CST		0	Source: Emergency Manager
An extended period of heavy rainfall led to flash flooding across Randolph County. Numerous roads were closed and culverts washed out. Water as deep as two feet was reported in Wedowee, mainly along 5th St and 1st Ave, where two manufactured homes were evacuated due to rising water. Additional roads were impassable near the community of Hawk, near Lake Wedowee, north of Wadley.				
<b>HALE COUNTY --- 2.2 E GREENSBORO [32.70, -87.54], 1.1 NNW GREENSBORO MUNI ARPT [32.69, -87.68], 1.7 W CYPRESS [32.95, -87.68], 1.8 WSW MOUNDVILLE [32.99, -87.65], 1.2 SE MOUNDVILLE [32.99, -87.60]</b>

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	----------------------	------------------------	------------------------

After five to six inches of rain fell across portions of Shelby county, waters were slow to recede once rain moved out of the area. Many roads remained impassable and water rescues continued, including in the Chandalar subdivision along Highway 31 in Pelham. Approximately 40 homes sustained major damage and another 10 sustained minor damage across the county.

---

**TALLAPOOSA COUNTY --- 4.5 WNW GOLDVILLE [33.10, -85.84], 4.3 WNW GOLDVILLE [33.10, -85.84], 1.4 N GOLDVILLE [33.10, -85.77], 2.4 N ZANA [33.05, -85.71], 1.5 NE STURDIVANT [32.94, -85.83], 4.0 NW OUR TOWN [32.87, -86.00], 2.7 NNW ALEXANDER CITY [32.98, -86.00]**

04/07/14 06:00 CST		0		Flood (due to Heavy Rain)
04/07/14 14:30 CST		0		Source: Emergency Manager

Three to four inches of rain fell across portions of Tallapoosa County causing area streams to rise , and water to flow out of ditches and across roadways. Many culverts were washed out, damaging many roadways in Alexander City and near New Site. Runoff continued for several hours after the rainfall ended around 8AM CST, and several roads remained temporarily closed. Roads that were severely damaged due to washed out culverts and pipes remained closed for several days while repairs were made. In addition, due to the saturated ground conditions, winds below severe criteria knocked down a couple trees near Reeltown.

---

**PIKE COUNTY --- BRUNDIDGE [31.72, -85.82]**

04/07/14 06:52 CST		0		Thunderstorm Wind (EG 55 kt)
04/07/14 06:52 CST		0		Source: Emergency Manager

A severe storm moved across portions of Pike county, knocking multiple trees down, including in Brundidge.

---

**CLEBURNE COUNTY --- 2.8 WSW HIGH TOWER [33.51, -85.44], 2.6 WSW HIGH TOWER [33.51, -85.44], 2.3 SW HIGH TOWER [33.51, -85.43], 2.6 SW HIGH TOWER [33.51, -85.44], 2.9 WSW HIGH TOWER [33.51, -85.44]**

04/07/14 07:00 CST		0		Flash Flood (due to Heavy Rain)
04/07/14 09:30 CST		0		Source: Emergency Manager

Three to four inches of rain fell across Cleburne County, leading to localized flash flooding. At the intersection of County Road 10 and County Road 51, west of Ranburne, eight inches of water flowed across the roadway.

---

**AUTAUGA COUNTY --- 4.5 NNW NEW PROSPECT [32.73, -86.58], 2.4 SE NEW PROSPECT [32.65, -86.52], 3.4 NE POSEYS XRDS [32.61, -86.53], 2.1 NW JOFFRE [32.59, -86.68], 2.4 WNW BILLINGSLEY [32.67, -86.76], 5.7 NNW WHITE CITY [32.73, -86.66]**

04/07/14 07:15 CST		0		Flood (due to Heavy Rain)

Heavy rainfall of up to 5 inches fell along the Alabama River Basin. This caused the river to rise to 37 feet near Selma, causing the river to rise out of its banks. Several roads along the river were inundated with flood waters approximately 3 hours after the heavy rain ended. Waters were slow to recede, leaving County Roads 326, 925 and 925 in the River Oaks community under water through the afternoon on the 8th.

**BIBB COUNTY --- 1.8 NE CENTERVILLE [32.97, -87.11], 2.3 N FAIRDALE [32.98, -87.15], 0.7 SE BRENT [32.92, -87.16], 0.9 NE CENTREVILLE FOX ARPT [32.93, -87.12]**

	04/07/14 09:00 CST		0	Flood (due to Heavy Rain)
	04/07/14 23:00 CST		0	Source: Emergency Manager

Heavy rainfall of up to 5 inches accumulated over the Cahaba River Basin, causing the river to rise to 23.1 feet. This led to approximately 30 roads in the Centreville area to become inundated with the flood waters. Water was slow to recede and left dozens of roads with minor to moderate damage. Damage estimates from the flooding were over \$88,000.

**On Sunday, April 6, a low pressure system developed in the northwestern Gulf of Mexico in response to a longwave trough crossing the central United States. The surface low tracked northeastward into Tennessee, bringing a warm front northward across Central Alabama. Warm, moist air rode over the warm front, leading to development of a large rain shield to the north of the frontal boundary. This rain slowly spread north across the forecast area during the day on April 6th. By late evening on April 6th, a band of heavier rain and strong to severe storms just ahead of a cold front pushed into west Central Alabama. Sporadic wind damage occurred throughout the night as storms tracked eastward and ground conditions became saturated. A series of thunderstorms producing very heavy rainfall trained over portions of the Birmingham metro area leading to a significant flash flood event, as more than six inches of rain fell in approximately 5 hours. Numerous water rescues were performed in Jefferson and Shelby counties. Heavy rainfall continued to shift south and east during the morning hours on Monday, April 7, resulting in flash flooding across portions of southeast Central Alabama. Rainfall ended by early afternoon as a cold front moved through the region.**

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/18/14 06:50 CST		13K	Strong Wind (MAX 39 kt)
	04/18/14 19:15 CST		0	

Widespread rainfall spread across Central Alabama on Friday, April 18, as a surface low slowly moved across the northern Florida panhandle and an upper level trough strengthened to a closed low while tracking along the northern Gulf of Mexico coast. Rainfall amounts across southeast Central Alabama ranged from 1.5 to 4 inches. A wake low developed behind the exiting and diminishing area of rain. With saturated ground conditions, wind speeds of 30-50 mph knocked down trees across several counties. In addition, pressure readings at TOI and MGM indicated quick pressure drops of just under 3 MB as the wake low moved through with maximum wind gusts of 38mph and 33 mph, respectively. A wind gust of 31mph was recorded at the Auburn AWOS as well.

**MARION COUNTY --- 1.5 NW PLEASANT RIDGE [34.19, -88.00], 2.5 SSW WIGINTON [34.25, -87.89]**

04/28/14 16:38 CST		15K	Tornado (EF0, L: 7.72 mi , W: 100 yd)
04/28/14 16:53 CST		0	Source: NWS Storm Survey

A tornado touched down near the intersection of County Road 75 and Bishop Road, in a rural area northwest of the city of Hamilton. It tracked northeastward through a largely rural area in central Marion County between the cities of Hamilton and Hackleburg. The tornado caused mostly tree damage as it crossed County Road 29, Highway 187, County Road 41, and Highway 43. One building on County Road 29, where winds were strongest at 85 mph, had some shingles blow off, a shed was destroyed, and a dozen trees were downed. The tornado lifted along Highway 43 near Traverse Station Road southwest of Hackleburg city limits.

**LAMAR COUNTY --- 8.3 W FERNBANK [33.54, -88.27], 2.3 NNW FERNBANK [33.58, -88.15]**

04/28/14 17:22 CST		0	Tornado (EF1, L: 8.08 mi , W: 500 yd)
04/28/14 17:33 CST		0	Source: NWS Storm Survey

A tornado originally touched down in Lowndes County, Mississippi, 3.2 miles south southeast of Steens and moved northeast, crossing into Alabama along State Road 96 in Lamar County. The tornado moved through the Lacey Brooke Community, where several well-built homes sustained minor roof and exterior damage. As the tornado tracked nearly parallel to State Road 96, dozens of trees were snapped or uprooted. The tornado took a turn to the north, crossing Luxapallia Creek, strengthening to winds of 100mph, and tracking parallel to Fernbank Road. It continue snapping trees until it dissipated near the intersection of Fernbank Road and Mud Creek Road, where only small limbs were damaged.

**LAMAR COUNTY --- 7.1 SSW MOLLOY [33.63, -88.23], 4.1 SSE MOLLOY [33.67, -88.18]**

04/28/14 17:28 CST		0	Thunderstorm Wind (EG 65 kt)
04/28/14 17:33 CST		0	Source: Amateur Radio

Numerous trees were blown down along County Road 9 from just southwest of the Star Community back to near the state line.

**PICKENS COUNTY --- 3.2 NNW STAFFORD [33.49, -88.28], 6.0 NE STAFFORD [33.51, -88.18]**

04/28/14 17:54 CST		0	Tornado (EF2, L: 6.21 mi , W: 500 yd)
04/28/14 18:02 CST	5	0	Source: NWS Storm Survey

A tornado initially touched down in Lowndes County, Mississippi, south of Columbus and traveled to the northeast, crossing the Alabama state line at County Road 30 in Pickens County. Tornado wind speeds were estimated at 115-120mph as it moved into Alabama. Along County Road 30, one site-built home was shifted off its foundation, trapping 10 people in the basement. There were also several mobile homes that were completely destroyed along with one small concrete building that had its roof removed and one exterior wall completely destroyed. The tornado continued northeast crossing U.S. Highway 82 and began to weaken along Bains Road, where several roofs sustained minor damage and several trees were uprooted. The tornado then rapidly dissipated near Tabernacle Road where only sporadic damage was found. It is also noteworthy that several damage points south of the tornado track were consistent with straight-line winds.

**PICKENS COUNTY --- 2.8 NNE STAFFORD [33.49, -88.24]**

04/28/14 17:57 CST		0	Thunderstorm Wind (EG 70 kt)
04/28/14 17:57 CST		0	Source: NWS Storm Survey

Several hardwood and softwood trees were uprooted on Bains and Caston Roads. Some minor roof damage also occurred in the area. This damage was immediately to the right of a tornado path and was believed to be caused by the rear flank downdraft.

**WINSTON COUNTY --- 1.0 S HALEYVILLE [34.22, -87.62]**

04/28/14 18:25 CST		0	Thunderstorm Wind (EG 56 kt)
04/28/14 18:25 CST		0	Source: Trained Spotter

Several trees were blown down just south of Haleyville.

**FAYETTE COUNTY --- 1.0 SSW BAZEMORE [33.89, -87.71], 1.1 NNE BAZEMORE [33.91, -87.69]**

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/28/14 18:35 CST		0.25M	Tornado (EF1, L: 2.08 mi , W: 350 yd)
	04/28/14 18:38 CST		0	Source: NWS Storm Survey

The tornado touched down near the intersection of County Road 73 and County Road 53 in northern Fayette County. Five to ten trees were either snapped or uprooted with some minor roof damage to a home at the initial touchdown. The tornado then crossed County Road 65 near Eldridge Road where a couple of outbuildings lost portions of their roof. The tornado intensified as it crossed County Road 53 near the intersection of Eldridge Road. Here a couple of outbuildings were near total losses, dozens of trees were blown down, and a residence sustained minor damage. The tornado continued northeast and crossed into Marion County.

### FAYETTE COUNTY --- GLEN ALLEN [33.92, -87.75]

04/28/14 18:38 CST	0	Thunderstorm Wind (EG 65 kt)
04/28/14 18:38 CST	0	Source: Emergency Manager

A roof was blown off a home in Glen Allen. This damage was just west of a tornado path.

### MARION COUNTY --- 0.9 WSW TEXAS [33.91, -87.69], 6.0 NNE BAZEMORE [33.98, -87.68]

04/28/14 18:38 CST	0	Tornado (EF1, L: 4.89 mi , W: 200 yd)
04/28/14 18:48 CST	0	Source: NWS Storm Survey

The tornado tracked into southeast Marion County from Fayette County near Little New River, and weakened to winds of 80 mph. The tornado continued to cause sporadic tree damage as it crossed Bankhead Highway near the community of Texas . The tornado made a turn to the north and tracked parallel to New River and crossed U.S. Highway 78 (I-22). The tornado continued to weaken and cause tree damage until it lifted along County Road 30 near County Road 174.

### WINSTON COUNTY --- 1.0 NE LYNN [34.06, -87.54]

04/28/14 19:10 CST	0	Thunderstorm Wind (EG 56 kt)
04/28/14 19:10 CST	0	Source: Trained Spotter

Several trees were blown down just northeast of Lynn.

### WALKER COUNTY --- 4.9 E JASPER [33.83, -87.19], 5.7 E JASPER WALKER CO ARP [33.86, -87.17]

04/28/14 19:40 CST	0	Tornado (EF1, L: 2.39 mi , W: 150 yd)
04/28/14 19:43 CST	0	Source: NWS Storm Survey

The tornado touched down just south of Richardson Road, south of the Boldo Community, where a couple of trees were uprooted. The tornado traveled to the northeast where it uprooted several trees as it crossed Golf Course Road and South Pine Drive. The tornado strengthened with winds of 90 mph as it crossed Boldo Road where several trees were snapped and uprooted and minor shingle damage occurred to a house. The tornado then crossed Alabama Highway 69 as it uprooted a couple of trees and caused minor damage to a church. The tornado took a slight turn to the northeast and continued to uproot trees and cause minor shingle damage to another home before it lifted along Robinson Loop just north of Alabama Highway 69.

### SUMTER COUNTY --- 0.6 S SILOAM [32.42, -88.27], 0.6 ENE SILOAM [32.43, -88.26]

04/28/14 20:30 CST	0	Tornado (EF1, L: 1.03 mi , W: 150 yd)
04/28/14 20:42 CST	0	Source: NWS Storm Survey

A short-lived tornado, with winds of 100 mph, touched down in a wooded area near W.L. Ezell Road in the Siloam Community. The tornado traveled to the northeast, crossing Alabama Highway 17 and dissipated south of U.S. Highway 80. Along W.L. Ezell Road and County Road 9, two well-built homes received significant roof and other structural damage. Nine other homes received roof damage, and several outbuildings were destroyed. A convenience store received significant damage to the roof and primary structure, and the fuel awning was destroyed. Additionally, a local fire station received significant damage to one of its buildings and minor damage to another. Along the path numerous trees were snapped and uprooted.

### TUSCALOOSA COUNTY --- 0.5 ENE ROSEDALE [33.20, -87.56]

04/28/14 20:30 CST	1	0	Heavy Rain
04/28/14 21:30 CST	1	0	Source: Emergency Manager

Heavy rainfall briefly fell across the city of Tuscaloosa , with approximately 1.28 inches of rain in one hour. Two individuals sought shelter from an possible tornado in the undeveloped basement of their home on the 1400 block of 22 nd Avenue. As water from the heavy rainfall leaked into the basement, the force of the water and intruding mud collapsed a retaining wall against them, resulting in one fatality.

Direct Fatalities: M21PH

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	----------------------	------------------------	------------------------

A tornado touched down near the intersection of Fosters Loop Road and Cypress Creek Road , where it snapped and uprooted hundreds of trees. It moved northeastward, crossing the Black Warrior River near Maxwell Bend . Several homes sustained significant roof and porch damage on the east bank of the river in the River Point Subdivision. It continued moving northeast, snapping and uprooting hundreds of trees and causing mainly minor shingle and roof damage to numerous homes as it moved through several subdivisions. As the tornado continued north and eastward, the tornado crossed Old Greensboro Road where it uprooted and snapped the trunks of numerous large, old hardwoods at the Little Sandy Baptist Church. The tornado continued northeast across Highway 69 with winds of 95 mph, where it downed multiple trees on the east side of the highway. The tornado took a more easterly track and produced sporadic tree damage until it reached the Taylorwood Estates subdivision and the Bear Creek trailer park . In this area, the tornado snapped or uprooted hundreds of trees. The tornado then moved east-northeast and caused sporadic tree damage as it crossed U.S. Highway 82 and Hargrove Road. Just west of Hargrove Road, the tornado uprooted and snapped numerous hardwood and softwood trees and caused major damage to 25 mobile homes as trees fell on the homes. One small porch was ripped from a double wide mobile home. The tornado then moved through the Woodland Forest subdivision where it uprooted and snapped hundreds of trees. As the tornado approached Buttermilk Road, southerly winds got under the soffit of a single family home and ripped out a small portion of the roof. The tornado caused minor roof damage and uprooted several trees on the east side Buttermilk Road before it finally lifted. This tornado was very close to the path of the F4 tornado in 2000.

---

**JEFFERSON COUNTY --- 0.6 W MORRIS [33.75, -86.83], 1.2 NW COUNTY LINE [33.84, -86.77]**

	04/28/14 21:00 CST		0	Tornado (EF1, L: 7.15 mi , W: 800 yd)
	04/28/14 21:17 CST	4	0	Source: NWS Storm Survey

The tornado touched down near Interstate 65, about one-half mile south of Sardis Road. The tornado moved to the northeast and crossed Interstate 65, where it snapped and uprooted hundreds of trees along the path. As the tornado continued to the northeast, it strengthened to winds of 100 mph. The tornado moved into the city limits of Kimberly where several structures were damaged. A vacant large retail building had its roof removed . The most extensive damage occurred to the Kimberly Church of God where uplift of most of the roof structure resulted in exterior wall collapse. The tornado crossed Stouts Road where the Kimberly Fire Department sustained major damage. The tornado continued to snap dozens of trees as it moved northeast and several homes had shingle damage. As the tornado crossed Bradford Trafford Road , multiple trees were uprooted with one falling on a home causing major roof damage. The tornado continued northward into Blount County.

**TUSCALOOSA COUNTY --- 0.5 SSW MAXWELL [33.07, -87.57]**

	04/28/14 21:05 CST		0	Thunderstorm Wind (EG 85 kt)
	04/28/14 21:05 CST		0	Source: NWS Storm Survey

Several hardwood trees were uprooted. This was immediately to the right of a tornado path and believed to be the rear flank downdraft damage.

---

**TUSCALOOSA COUNTY --- 0.3 NNE MAXWELL [33.08, -87.57]**

	04/28/14 21:06 CST		0	Thunderstorm Wind (EG 69 kt)
	04/28/14 21:06 CST		0	Source: NWS Storm Survey

At least 10 homes suffered minor roof damage or siding damage. This damage occurred to the right of a tornado path and was believed to be the rear flank downdraft damage.

---

**JEFFERSON COUNTY --- 1.1 NNW MULGA MINE [33.59, -87.01], 0.7 W BROOKSIDE [33.63, -86.93]**

	04/28/14 21:13 CST		0	Tornado (EF2, L: 5.46 mi , W: 1800 yd)
	04/28/14 21:23 CST	3	0	Source: NWS Storm Survey

The tornado touched down near Oak Leaf Circle and traveled to the northeast where it snapped and uprooted dozens of trees along its path. The tornado intensified as it neared Cruce Road just south of Graysville, with winds of 105 mph. Here, approximately four manufactured homes sustained major damage with one being completely destroyed after it rolled several times. The tornado continued on its northeast path and snapped and uprooted hundreds of trees. As it crossed Adamsville Parkway , just south of Graysville, the tornado strengthened with winds of 125 mph. In this area, two brick homes sustained damage from partial exterior wall collapse. Several other homes sustained roof damage and a manufactured home sustained damage. Additionally, hundreds of trees were downed. The tornado took a slight right turn and crossed Interstate 22 near Cherry Avenue before it lifted along Brookside Cardiff Road near McCay Road.

---

**BLOUNT COUNTY --- 1.2 WSW NYOTA [33.84, -86.77], 1.1 SSE HAYDEN [33.86, -86.76]**

	04/28/14 21:17 CST		0	Tornado (EF0, L: 1.63 mi , W: 700 yd)
	04/28/14 21:20 CST		0	Source: NWS Storm Survey

The tornado crossed from Jefferson County into Blount County between Garrett Road and Nyota Road . With winds of 80 mph, the tornado began to weaken as it crossed into Blount County, where sporadic tree damage was observed. The tornado traveled northward and crossed Elvester Road and lifted near Sagefield Lane and Mountain Lake Road.

	04/28/14 22:25 CST		0	Source: NWS Storm Survey
The tornado touched down near Academy Drive and Southgate Lane in Bessemer and traveled to the northeast , snapping and uprooting dozens of trees along its path. In addition, dozens of homes sustained damage from downed trees. The tornado intensified with winds of 120 mph as it neared the Frank House Municipal Golf Course where the clubhouse was destroyed. The tornado continued on its northeast path, crossing the golf course, snapping and uprooting hundreds of trees. Several homes and an apartment complex sustained significant roof damage around Memorial Drive. The tornado continued to the northeast as it paralleled 4th Avenue North. The tornado took a slight turn to the east as it crossed Alabama Highway 150, causing minor damage to a home and small restaurant. Hundreds of trees were uprooted through Bessemer, before the tornado lifted near the intersection of Dartmouth Avenue and 31st Street South.				
<b>BLOUNT COUNTY --- 2.1 SSE ALLGOOD [33.89, -86.49], 0.4 E TAIT'S GAP [33.97, -86.39]</b>				
	04/28/14 22:22 CST		0	Tornado (EF1, L: 7.81 mi , W: 1000 yd)
	04/28/14 22:35 CST		0	Source: NWS Storm Survey
The tornado touched down near the intersection of Boat Landing Road and Seven Mile Road, about 4 miles south-southwest of the city of Oneonta, where it damaged and uprooted several trees. From there the tornado moved northeastward, paralleling the ridge of Straight Mountain the entire time it was on the ground. It remained over largely rural areas for much of its path and broadened to 1000 yards wide just after crossing US-231 as it strengthened with winds of 105 mph. Damage along US-231 consisted of mainly snapped pines and uprooted hardwoods. There was minor damage to a few homes and buildings in the area, although one chicken barn was heavily damaged. The tornado moved north- northeastward across Wadsworth Road and continued to cause widespread tree damage. It tracked along Airport Road continuing to down trees and cause predominantly minor roof damage to homes and significant damage to outbuildings and hay barns. The only exception was a small older home that sustained significant damage. The tornado maintained its strength as it crossed County Road 20, Lowes Road, and finally Airport Road once again before dissipating rapidly at the airport .				
<b>ST. CLAIR COUNTY --- 4.5 WNW SPRINGVILLE [33.80, -86.54], 4.3 WNW SPRINGVILLE [33.80, -86.53]</b>

	04/28/14 23:25 CST		0	Source: NWS Storm Survey
The tornado touched down just north of Mountain View Lane in extreme northwestern St. Clair County, just south of the Blount County line. Damage was minor at the beginning of the tornado and limited to trees. The tornado continued northeast crossing into Blount County.				

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>BLOUNT COUNTY --- 2.8 SE INLAND JCT [33.80, -86.53], 1.8 SSE ONEONTA ROBBINS ARPT [33.95, -86.37]</b>				
	04/28/14 23:25 CST		0	Tornado (EF2, L: 14.26 mi , W: 1300 yd)
	04/28/14 23:43 CST	2	0	Source: NWS Storm Survey
<p>The tornado strengthened as it moved into southeast Blount County, near Golden Lake, and tracked along County Road 24. Some of the most extensive damage occurred just north of Pine Mountain Road, where winds were estimated at 130 mph. At this location, a home that was under construction but almost completely finished, was swept off its foundation and thrown about 50 yards into a lake. A small utility trailer was also thrown about 25 to 50 yards. Dozens of trees were either snapped or uprooted as well. The tornado tracked northeast, parallel to Inland Lake, snapping and uprooting thousands of trees and causing significant damage to two homes on Pine Mountain Rd near Cut Off Rd . A single wide and double wide manufactured home were completely destroyed on Dumas Bridge Road, and at this location there were two injuries. The tornado continued northeastward and crossed Highland Lake with a width of 1000 yds, snapping or uprooting every tree in its path. On the shores of the lake, several homes received major damage directly from tornadic winds. On Echo Lane, a well-built single family home had its roof completely removed, while 2-by-6 exterior walls remained standing, and non-load bearing walls were buckled. The neighboring home also had its roof torn off with some exterior walls collapsed . A three story home across the slough had major structural damage and was partially shifted off its foundation . Along the north shore of Highland Lake, the tornado continued snapping and uprooting trees, and damaging several more homes. The tornado weakened slightly as it crossed County Road 29 and Rogers Rd, with tree damage becoming more sporadic. However, several homes sustained significant damage in these locations. The tornado took a slight turn to the right and continued to weaken as it crossed County Road 20 and U.S. Highway 231. Northeast of U.S. Highway 231, six chicken barns were destroyed along Montgomery Drive. The tornado narrowed and lifted northeast of Hutchins Drive near the Blount and Etowah County line.</p>				
<b>ETOWAH COUNTY --- 1.5 E WHITESBORO [34.17, -86.04], 3.5 NE WHITESBORO [34.20, -86.02]</b>				
	04/28/14 23:32 CST		0	Tornado (EF3, L: 2.53 mi , W: 600 yd)
	04/28/14 23:37 CST		0	Source: NWS Storm Survey
<p>The tornado initially touched down just south of Brow Road, about 4.5 miles east of Sardis City, snapping and uprooting many trees. The tornado rapidly intensified as it tracked northeast. Severe damage occurred along Liberty Hill Road where a home was lifted off its block foundation and moved about 60-80 feet from its original location. Despite this, most of the exterior walls (and even a portion of the roof) remained intact. Numerous trees around this property were snapped near the base indicating very strong winds. Several manufactured homes were completely destroyed in this area as well. Two other homes sustained significant roof loss and exterior wall damage. Along Horton Gap Road, a two-story home was destroyed with just a few interior walls left standing. Much of the debris was thrown several hundred yards away from its original location and trees were ripped out of the ground and thrown. Just northeast of this location, a large wood-framed chicken house was destroyed. At these locations, the tornado was at its peak intensity with winds estimated between 135 and 155 mph. On either side of the center line track, damage was seen along Owens Road (west of the track) and Roden Road (east of the track), as a result of inflow into the storm. Structural damage along these roads resulted in loss of roof and exterior walls/side panels as well as numerous trees snapped or uprooted. The tornado crossed into Dekalb County near the intersection of Gene Burns Rd and County Road 4.</p>				
<b>ETOWAH COUNTY --- 2.1 WNW ROCKLEDGE [34.09, -86.16], 0.9 NW SARDIS CITY [34.18, -86.13]</b>

	04/29/14 00:27 CST		0	Source: NWS Storm Survey
<p>A short-lived tornado touched down along Egypt Road near Vaughn Lane snapping a few trees . The tornado tracked north-northeast and intensified near Shady Grove Road where a single-wide manufactured home was destroyed. Near the intersection of Mountainboro Road and Carlisle Cut Off, a house was shifted off its foundation, but the house itself sustained only minor roof damage. A wood barn in a field was also heavily damaged . Just south of Lawson Gap Road, several trailers were damaged with one losing its roof and portion of its exterior walls. Trees were snapped or uprooted on the west side of Mountainboro Road. The tornado was at its peak intensity along Mountainboro Road between Shady Grove Road and Lawson Gap Road, with maximum winds between 90 and 100 mph. The tornado continued north, causing additional damage along Skyhaven Drive, where a two-story house lost a portion of its roof covering. Several trees were snapped or uprooted around this location as well. To the north, off Douglas Drive, a manufactured single-wide home lost most of its roof, its entire garage/car port and a good portion of one exterior wall. The tornado crossed U.S. Highway 431, snapping several trees near the intersection of Highway 205. Between Cox Gap Road and Gaines Street several large trees were snapped or uprooted and displayed a convergent path toward the center line of the tornado. The tornado crossed Sardis Road snapping a few trees near the intersection of Sardis Cut Off Road before lifting.</p>

	04/29/14 02:57 CST		0	Source: NWS Storm Survey

The tornado touched down one-tenth of a mile west of Flourney Road in Russell County, where several trees were snapped. It then traveled to the northeast, where it snapped and uprooted dozens of trees, with winds of 87 mph. The tornado continued into Lee County.

<b>LEE COUNTY --- 2.4 SSE PRINCE XRD [32.47, -85.23], 1.8 W STONEWALL [32.57, -85.08]</b>				
	04/29/14 02:57 CST		0	Tornado (EF3, L: 11.14 mi , W: 1200 yd)
	04/29/14 03:12 CST	13	0	Source: NWS Storm Survey

The tornado crossed into Lee County, approximately six-tenths of a mile west of County Line Road. It continued to the northeast and strengthened to its maximum intensity near AL-169, with winds of 140 mph. At this location, approximately 6 manufactured homes were lifted, rolled, and completely destroyed. Additionally, a split level home had its roof and the exterior walls of the top floor removed. Three wood frame homes were also lifted off their foundation and completely destroyed. Several more homes sustained roof damage. Hundreds of trees were snapped off or were uprooted, with several trees debarked. From here, the tornado traveled northeast, where it continuously uprooted trees along its path. As it crossed Lee County Road 205, one home suffered extensive roof damage, while approximately 20 additional homes sustained mainly shingle damage. The tornado crossed Lee County Road 179, where a few additional homes suffered minor roof damage as well. As it continue to the northeast, it began to weaken considerably and crossed US-280. A few trees were uprooted at this location. The tornado lifted along Lee County Road 298, approximately four-tenths of a mile from Lee County Road 318.

Quarter size hail was reported in the Cotton Lakes Subdivision.

A large scale severe weather event began Saturday, April 26 and ended Wednesday, April 30th, producing several waves of severe weather from the Central Plains eastward through the Deep South, and across a significant portion of the eastern United States. Strong and violent tornadoes, very large hail, flash flooding, and damaging straight line winds accompanied this dynamic storm system. The most tornadoes occurred across the Deep South as the system moved into Mississippi and Alabama on Monday, April 28th. Supercell thunderstorms developed during the afternoon over eastern Mississippi and northwest Alabama in the warm sector well ahead of a cold front. The activity slowly spread east and southeast overnight, with this wave of severe storms ending early Tuesday morning. Storms redeveloped late Tuesday afternoon and moved into Central Alabama. A large area of rainfall across the northern Gulf Coast limited the amount of instability across the area, and storms remained below severe limits. The last wave of severe weather occurred early Wednesday morning across the south as an isolated storm produced large hail, as the system finally pulled east of the area.

04/28/14 15:02 CST	0	Source: NWS Storm Survey

A tornado first touched down along Whitten Road near the intersection of Willis Road on the northwest side of Russellville . Trees were uprooted in this area and small trees were snapped. The tornado tracked northeast approaching the school complex. Here a tree was snapped and fell onto a house along Clay Avenue causing significant structural damage. The school complex along Summit Avenue sustained damage to its athletic fields and one awning at the elementary school was damaged. Across the street several trees were snapped near the base and a home sustained minor roof damage.

The tornado then appeared to weaken briefly with only very light damage noted over the next 2 miles before touching back down near Alpine Street. Here numerous hardwoods were twisted, mangled, and snapped. Several trees fell on houses causing substantial structural damage. The tornado reached its maximum intensity of EF-1 with a width of approximately 100 yards. Interviews with several residents indicated that they observed a multiple funnel type of tornado track across the neighborhood. The tornado lifted northeast and weakened as it produced minor tree damage along Mountain View Drive before dissipating.

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tornado rapidly intensified over Wheeler Lake resulting in extensive damage across southwest Limestone County .

Significant damage occurred at the Bay Hill Marina in Limestone County where a 2-story condominium was destroyed and a large metal building structure (used to store boats) sustained nearly complete failure of its exterior frame. Additional residences and condos had roof and exterior wall/siding damage and numerous large trees were snapped or uprooted. Several docks with metal protective coverings were destroyed. The tornado was near its peak intensity across this area, with winds between 120 and 140 mph.

The tornado continued east-northeast snapping numerous power poles near their bases along Snake Road. Along Log Cabin Road, just South of Highway 72, several homes sustained significant (if not complete) roof loss along with partial collapse of exterior walls. One single-family residence slid several feet off its concrete slab foundation. A trailer was also completely destroyed. The tornado maintained high-end EF-2/low-end EF-3 strength as it crushed Billy Barb's Trailer Park on Highway 72 in the Coxe community. 25 units were completely destroyed or uninhabitable. Two confirmed fatalities occurred at this location, with at least a dozen others injured. Debris was thrown across Highway 72 near Gordon/New Cut Road. The tornado crossed Highway 72 entering a mainly rural area of Limestone County. Numerous trees were snapped or uprooted on either side of Highway 72 between Blue Springs Road and Parker Road.

The last significant area of damage occurred at a neighborhood community near the intersection of Seven Mile Post and Guinn Road. At this 10-acre location, nearly every home (concrete masonry unit) sustained some damage with at least a half dozen destroyed. One unit was swept clean off its foundation but was not anchored/secured to its foundation. The tornado continued east-northeast producing mainly EF-0 and EF-1 damage, minor roof/siding damage and snapped or uprooted trees, before gradually lifting just north of Athens near the intersection of West Elm Street and North Jefferson Street.

It should be noted that sporadic damage (mainly trees snapped or uprooted) was seen extending at least 1/2 to 1 mile on either side of the center track of this tornado. This damage was not included in the path width.

Direct Fatalities: F60MH, M34MH

	04/28/14 17:05 CST		0	Source: NWS Storm Survey

A tornado touched down along Charity Lane between Stafford and Butter-and-Egg Roads. It tracked almost directly eastward along Charity Lane, snapping and uprooting hundreds of trees and causing minor roof damage to multiple houses. At Charity Baptist Church, the tornado uprooted a very large oak tree believed to be around 150 years old. It began tracking more to the northeast as it reached Frank Patterson Road, continuing to snap many more trees in the Hazel Trace and Hazelwood Drive area. It crossed Highway 231/431, collapsing a carport near Carriger road. The tornado continued to snap and uproot many more trees along Mulberry Road, Bevills Church Road, Greenville Pike, and Everett Jones Road. The tornado dissipated just east of Everett Jones Road, just south of Borderline Road and the Tennessee State Line.

04/28/14 19:28 CST	0	Source: NWS Storm Survey

The tornado continued from Jackson into DeKalb County south of Higdon. Most of the damage observed was to trees, with multiple trees uprooted or snapped along the tornado path. The most significant damage occurred along CR 155 near the intersection of CR 823. In this area, minor roof damage and underpinning damage was observed at several mobile homes. One single family house along CR 155 sustained more significant roof, carport, and siding damage. The tornado continued to move northeast, causing additional damage to homes, outbuildings, and one church.

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tornado first touched down in the Welti community along CR 636. Numerous hardwood trees were snapped and uprooted in this area. The tornado continued to move north with significant damage to a one story home along CR 601. Major roof uplift was noted to this home and a building under construction at the same site was completely destroyed and blown several hundred yards. A large travel trailer was also rolled. Damage at this location was deemed EF-2 in intensity. Further north along the road a large outbuilding was completely destroyed.

The tornado intensified as it moved northward crossing the Broglen River. Here the tornado widens to near 350 yards. Many hardwood trees were snapped and uprooted along the path. A chicken farm sustained damage along CR 732. Near this location along CR 736 a well constructed two story brick home sustained severe damage when the upstairs was completely wiped away and blown several hundred yards into a ravine. Large debris missiles were seen embedded in the surrounding fields. Several trees in this area were also severely mangled and partially debarked. Damage in this area was rated low end EF-3.

The tornado continued to track northward ripping the roof completely off a home at the intersection of CR 736 and 703. The tornado intensity oscillated as it tracked northward toward the Berlin community. Numerous wooden power poles were snapped along CR 703. Numerous trees were snapped or uprooted as it crossed Highway 278 with some trees sheared near the base.

A TVA substation suffered significant damage with large electrical lines damaged and poles snapped and destroyed. The survey team was not able to fully observe this damage due to security restrictions but online photos indicate that this particular damage is consistent with at least high end EF-2 or possibly EF-3 damage. A chicken farm sustained severe structural damage with one house completely wiped to the ground with the metal trusses severely mangled. 25,000 chickens were killed in this one location. A mobile home along CR 747 was completely destroyed with debris thrown over 50 yards. Additional tree damage was noted in this area. The tornado weakened quite rapidly after this point lifting just north of Hwy 69.

**DEKALB COUNTY --- 2.3 S LIBERTY [34.17, -86.05], 2.4 SSW DAWSON [34.27, -85.95]**

04/28/14 23:37 CST	0	Tornado (EF2, L: 9.20 mi , W: 600 yd)
04/28/14 23:47 CST	0	Source: NWS Storm Survey

A strong tornado tracked from Etowah into DeKalb County producing damage of EF -2 intensity. Just south of where CR 4 and 450 meet, a manufactured home was completely destroyed. The undercarriage was so badly mangled and twisted up, it was nearly unrecognizable. Trees were also debarked at this location.

Where CR 4/450 and 455 meet, a single-story home was heavily damaged and shifted off its foundation. Nearly the entire roof was lifted. The tornado continued to produce damage as it tracked northeast, crossing CR 25. The tornado was at least 1/4 mile wide at this point with noticeable damage seen along CR 4 (east of the center track) and CR 455 (west of the track). The tornado then took a slight jog to the north and crossed CR 457 and 29 where several homes sustained significant loss of roof covering/shingles and trees were either snapped or uprooted. The tornado appeared to enter a weakening phase at this point. On the west side of the track, a small farm outbuilding collapsed and a large oak tree fell on top of a home along CR 29. Trees were either uprooted or snapped along CR 1920. The tornado crossed CR 4 again (just north of CR 1920) and approached the higher terrain/ridgetop area west of Dugout and Little Sand Valley. Trees were seen snapped or uprooted. A barn was destroyed along CR 4, just south of Coal Creek. The tornado had narrowed significantly by this point but was still producing winds between 80-90 mph.

Nearing the end of its life, the tornado crossed Highway 227 over the higher terrain, snapping and uprooting a narrow corridor of trees. Just north of highway 227, along CR 12 just north of Hayes Gap, additional trees were snapped. No additional/definitive damage was seen north of this location, so the tornado is believed to have lifted in the higher terrain just north of CR 12 and west of CR 221 in southern DeKalb County, about 4 miles southeast of Crossville.

**DEKALB COUNTY --- 0.5 N DAWSON [34.31, -85.93], 1.6 ENE FAIRVIEW [34.34, -85.90]**

04/28/14 23:54 CST	0	Tornado (EF2, L: 2.47 mi , W: 200 yd)
04/29/14 00:00 CST	0	Source: NWS Storm Survey

A tornadic cyclic supercell produced another tornado in the community of Dawson along County Road (CR) 20. Numerous trees were snapped and/or uprooted in this area. The tornado tracked north-northeast snapping additional trees along CR 199, and damaging a mobile home. Another home received minor structural damage along CR 196. The tornado fell a wide swath of trees before it crossed Highway 57. Here it reached maximum intensity (EF-2) with winds of 115 mph, nearly destroying a small home. Several large farm buildings were significantly damaged near the intersection of CR 204 and 57. The tornado nearly paralleled the highway as it tracked further north. Another home sustained roof damage along CR 57 as well. The tornado began a weakening phase north of the intersection with CR 204, with mainly tree damage noted north of that location. The tornado finally lifted just north of the intersection of CR 57 and 109.

**DEKALB COUNTY --- 1.6 SSW LEBANON [34.35, -85.84], 2.0 NNW FT PAYNE ISBELL ARPT [34.50, -85.74]**

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tornadic cyclic supercell produced yet another tornado along County Road (CR) 209 where mainly branches were snapped. The tornado lifted northeast snapping additional branches before strengthening as it approached CR 52. Here, severe hardwood trees were snapped or uprooted near a farmstead. Additional trees were snapped and/or uprooted along a wide swath all along CR 88. The tornado may have weakened or even lifted very briefly as it crossed the Highway 35 intersection near Dugout Valley Road/CR 97 west-norhtwest of Fort Payne. The tornado intensified once again as it tracked northeast, uprooting and snapping more trees. The tornado reached peak intensity with estimated winds of 115 mph and a path width of 200 yards near the intersection with Chisenhall Road. At this location, the tornado rolled and separated a mobile home from its frame, peeled roofing back from another mobile home, and snapped many trees in a forested area just northeast of the intersection. It continued to track along CR 97, but weakened significantly, causing mostly tree damage or very minor structural damage to single family homes (two homes sustained minor roof damage or broken windows just north of the Chisenhall/CR 97 intersection). The tornado narrowed significantly before lifting along CR 609 just north of the intersection with CR 27.

**DEKALB COUNTY --- 0.3 NNE ARONA [34.22, -86.08], 1.1 SW KILPATRICK [34.26, -86.08]**

04/29/14 00:28 CST	0	Tornado (EF0, L: 2.42 mi , W: 75 yd)
04/29/14 00:32 CST	0	Source: NWS Storm Survey

A small tornado touched down in the Aroney community in the southwest corner of DeKalb County . The tornado first touched down along County Road (CR) 479. Here, minor roof damage was noted to a single family home, and a farm building was also damaged. Minor damage was also noted to trees all along CR 479. Several small hardwood trees were snapped just north of CR 10, and other trees had the tops snapped off in this area . Another barn sustained minor roof damage further north along the road, and a home sustained very minor damage. The tornado eventually lifted just south of Highway 168 near the Kilpatrick Community.

---

**DEKALB COUNTY --- 0.4 NNE RIVER PARK [34.50, -85.62], 2.1 NE KAOLIN [34.64, -85.56]**

04/29/14 00:36 CST	0	Tornado (EF1, L: 10.20 mi , W: 200 yd)
04/29/14 00:51 CST	0	Source: NWS Storm Survey

A tornado touched down south of Mentone along the Desoto Parkway (CR 89) just south of the intersection with CR 165. Here, several large cedar trees were snapped. The tornado moved northeast, paralleling the western side of CR 165. Mainly tree damage was noted in this area, with minor structural damage to barns and outbuildings. Several stands of old growth hardwoods were damaged here.

The tornado seemed to weaken briefly with only minor tree damage noted near downtown Mentone. Further up the slopes of Lookout Mountain, the tornado strengthened again to EF-1 intensity with speeds up to 105 mph, with sporadic swaths of hardwood trees snapped or uprooted, all along the eastern side of CR 89, before lifting just inside the state line.

**DEKALB COUNTY --- 2.7 NE ADAMSBURG [34.43, -85.65], 2.9 SE FISHER XRDS [34.44, -85.63]**

04/29/14 01:23 CST	0	Tornado (EF1, L: 1.05 mi , W: 200 yd)
04/29/14 01:25 CST	0	Source: Unknown

Damage was first noted just south of Bird Dog Trail at the southern end of a large farmstead . Numerous trees were snapped and uprooted and a large 40 by 50 feet barn was destroyed. This brief tornado appeared to be at its peak intensity near this location with estimated winds of 100 mph. It should be noted that the barn damage was cleaned up at the time of the survey, but the homeowner confirmed the barn had totally collapsed. Several trees were snapped adjacent to the west side of a house which had no major damage. The short lived tornado moved northeast with additional trees snapped or uprooted just across Bird Dog Trail (north side). Two by fours and tin from the barn was seen here on the ground and in the trees . The homeowner also noted that tin from the barn was seen here on the ground and in the trees. The homeowner also noted that tin from the barn roof was tossed to at least the end of the tree line, which is approximately 1/3 of a mile away. The tornado then crossed a rural/forested area to the intersection of Pumpkin Center Road and CR 153/Fletcher Road. Small to medium sized branches were brought down at the southwest corner of this intersection. No additional damage was seen downstream from this location but very limited road access existed.

**DALE COUNTY --- CLOPTON [31.60, -85.43], HIGHWAY 231 PEA RIVER BRIDGE [31.59, -85.78], LEVEL PLAINS [31.30, -85.76], CLAYHATCHEE [31.26, -85.71], CURRYTOWN [31.27, -85.52], GRIMES [31.30, -85.44], BERTHA [31.54, -85.42]**

04/08/14 12:00 CST	50K	Flood (due to Heavy Rain)
04/09/14 12:00 CST	0	Source: Emergency Manager

Moderate to heavy rain fell across Dale county over a long period of time. Given that 4 to 6 inches of rain had occurred during the prior week, the ground was saturated and areal flooding resulted. Several roads were closed and damaged due to the flooding, including most of the dirt roads in the county. Some roads affected included CR15, CR560, Waterford, Hopeful Church, and Gissendanner. The county engineer estimated at least \$50,000 in road damage.

**A strong upper level long wave trough moved through the southeast states and produced a large area of 4 to 6 inches of rain over portions of southeast Alabama. This was rain was spread out over a several hour period, so although flash flooding was minimal, some areal flooding did occur in portions of Dale county. This resulted in road damage of at least \$50,000.**

A strong long wave trough was centered over the mid Mississippi Valley extending south to the Gulf coast with several shortwaves rotating around it. This led to occasional severe weather and flooding across the area. The worst of the flash flooding stayed south of the area across portions of the Florida panhandle, but the combination of a very wet month and additional moderate to heavy rain led to some areas of flash flooding and areal flooding across portions of Coffee, Geneva, and Houston counties. Houston county estimated damages in excess of \$800,000 due to mainly dirt roads and cross-drains washed out by flooding.

### CLARKE COUNTY --- 2.6 SW ALLEN [31.58, -87.76], 2.3 SW ALLEN [31.58, -87.76]

	04/28/14 23:15 CST		5K	Tornado (EF1, L: 0.31 mi , W: 200 yd)
	04/28/14 23:17 CST		0	Source: NWS Storm Survey

NWS survey team found damage consistent with a small...weak tornado over central Clarke County to the south-southeast of Grove Hill. Damage indicated that the tornado tracked northeast for approximately 500 yards. The damage initially began as a straight line wind event. The damage became more convergent...denoted by the downed and snapped tree pattern...indicating a brief tornado. The damage returned to a more linear non-tornadic pattern and the degree of damage gradually decreased across an additional two mile long path.

## Storm Data and Unusual Weather Phenomena - April 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

The southern half of Baldwin county experienced historic flooding the night of April 29th into the early morning of April 30th. Rain totals of 12 to 24 inches were reported, with the maximum rainfall occurring in a swath from Foley south to Gulf Shores and Orange Beach, east to the Florida state line. The highest reported was 23.67 inches in Orange Beach via a CoCoRAHS observer. The Fish River at Silverhill crested at record high level of 23.18 feet. The Styx River at Elsanor experienced its second highest crest on record at 20.90 feet.

1400 homes and businesses experienced flooding and private property losses are estimated at \$17 million with another \$10 million estimated for infrastructure damage. Almost every road south of Highway 104 experienced flooding. Numerous roads were flooded between Highway 104 and just north of Interstate 10. The flooding resulted in extensive damage to numerous roads and bridges throughout the county. Emergency management officials reported having to rescue dozens of people from homes and vehicles due the rapid rise of the water. A significant portion of the bluff in Spanish Fort, along Patrician Drive, was washed away.

A 67 year old man was killed in Foley when his car was swept off Airport Drive by fast rising water from the adjacent Magnolia River .

Direct Fatalities: M67VE

**MOBILE COUNTY --- 2.4 SE SARALAND [30.80, -88.04], 2.9 SW MOFFET [30.82, -88.41], 3.7 SW GRAND BAY [30.43, -88.40], 4.8 E MON LOUIS [30.43, -88.02]**

04/29/14 19:44 CST	6.50M	Flash Flood (due to Heavy Rain)
04/30/14 07:00 CST	0	Source: Emergency Manager

Ten to seventeen inches of rain fell across much of central and southern Mobile county . Most of that rain fell during the evening of April 29th through the early morning of April 30th. Widespread flash flooding was reported across central and southern Mobile county, including the city of Mobile. Numerous roads were closed due to being impassable and dozens of people had to be rescued from cars that drove into flooded areas. Massive sinkholes developed on Girby Street and on Dauphin Street at Mcgrerer Street. Homes were flooded in a Theodore subdivision .

**A strong storm system brought record flooding along with severe thunderstorms that produced damaging winds and tornadoes to the region.**
