	04/05/22 04:20 CST	0		Source: Public
Large hail reported along Highway 10 between Nanafalia and Sweet Water.				
MARENGO COUNTY --- 1.2 E LINDEN [32.30, -87.78]				
	04/05/22 04:38 CST	0		Hail (2.75 in)
	04/05/22 04:39 CST	0		Source: Social Media
Several reports of egg-size to baseball size hail near Linden. Several vehicles had their windows shattered.				
MARENGO COUNTY --- 4.3 ENE MAGNOLIA [32.15, -87.60]				
	04/05/22 04:49 CST	0		Hail (1.50 in)
	04/05/22 04:50 CST	0		Source: Public
DALLAS COUNTY --- 2.8 SSE CENTRAL MILLS [32.24, -87.41]				
	04/05/22 05:06 CST	0		Hail (2.50 in)
	04/05/22 05:07 CST	0		Source: Public
Large hail reported along Highway 5 southwest of Safford.				
ELMORE COUNTY --- 5.1 SE MAN [32.46, -86.20]				
	04/05/22 06:23 CST	0		Hail (1.00 in)
	04/05/22 06:24 CST	0		Source: Public
Large hail reported along Highway 231 near the Tallapoosa Water Plant.				
MONTGOMERY COUNTY --- PINTLALLA [32.18, -86.37]				
	04/05/22 06:51 CST	0		Hail (1.00 in)
	04/05/22 06:52 CST	0		Source: Trained Spotter
ELMORE COUNTY --- 2.4 SSE WETUMPKA [32.52, -86.20], 4.2 SW CLAUD [32.54, -86.13]				
	04/05/22 09:54 CST	0		Tornado (EF2, L: 4.36 mi , W: 900 yd)
	04/05/22 10:00 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in southern Elmore County and determined that it was consistent with an EF 2 tornado, with maximum winds near 134 mph. The tornado touched down on Harrogate Springs Road and tracked northeast snapping and uprooting trees. It strengthened to EF2 as it crossed Wildwood Lane where a large swath of trees were snapped and one residence suffered significant damage . The tornado weakened as it crossed Jimshill Road and dissipated near Firetower Road.				
PIKE COUNTY --- 1.2 NNW ANSLEY [31.90, -86.13], 4.1 W ORION [31.97, -86.07]				
	04/05/22 10:03 CST	0		Tornado (EF1, L: 5.93 mi , W: 1100 yd)
	04/05/22 10:09 CST	0		Source: NWS Storm Survey
National Weather Service meteorologists surveyed damage in northwest Pike County and determined that it was consistent with an EF 1 tornado, with maximum winds near 110 mph. The tornado touched down just west of the intersection of County Road 1107 and 1101. The tornado tracked northeast nearly paralleling County Road 1107 where damage consisted of numerous snapped and uprooted trees, some of which fell on and caused significant damage to a residence. The tornado also produced minor roof damage to additional nearby homes and shifted a manufactured home off of its block piers . It crossed into southeast Montgomery County just west of Little Patsaliga Creek.				
ELMORE COUNTY --- 0.2 NW GOOD HOPE [32.57, -86.02], 0.8 SSE KENT [32.61, -85.94]				
	04/05/22 10:06 CST	0		Tornado (EF0, L: 5.31 mi , W: 300 yd)
	04/05/22 10:13 CST	0		Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>National Weather Service meteorologists surveyed damage in eastern Elmore County and determined that it was consistent with an EF 0 tornado, with maximum winds near 85 mph. The tornado touched down along Highway 14 just east of County Road 186. Damage consisted mostly of uprooted trees with some structural damage caused by fallen trees. A few homes also had damage caused directly by wind, such as missing shingles, soffit, and fascia. A carport was also blown off a home. The tornado dissipated at Kent Road.</p>				
<hr/>				
MONTGOMERY COUNTY --- 3.7 S CURRY [31.97, -86.07], 4.1 ESE PINE LEVEL [32.05, -86.00]				
	04/05/22 10:09 CST		0	Tornado (EF2, L: 6.75 mi , W: 1100 yd)
	04/05/22 10:18 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southeast Montgomery County and determined that it was consistent with an EF 2 tornado, with maximum winds near 120 mph. This tornado originated in northeast Pike County and crossed into Montgomery county just west of Little Patsaliga Creek. The tornado reached its peak intensity just after crossing into Montgomery County where is caused the collapse of metal electric transmission tower. The tornado tracked northeast and crossed County Road 94 where numerous trees were uprooted and snapped. The tornado then crossed Highway 231 where several homes suffered loss of roofing. It weakened as it approached Meriwether Trail and lifted just after crossing Meriwether Trail .</p>				
<hr/>				
MACON COUNTY --- 1.0 SSW FRANKLIN [32.47, -85.81], 2.9 NW CHEHAW [32.51, -85.76]				
	04/05/22 10:19 CST		0	Tornado (EF1, L: 4.25 mi , W: 250 yd)
	04/05/22 10:24 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in northern Macon County and determined that it was consistent with an EF 1 tornado, with maximum winds near 90 mph. The tornado touched down along Highway 49 in the Franklin community. The tornado moved somewhat erratically northeastward, crossed largely harvested forested fields as it approached Macon County Road 36, breaking a few large tree limbs or causing a few trees to lean into others. The tornado continued across open fields before breaking large limbs along Chewacla Creek. After crossing the creek, the tornado crossed the site of the historic Tuskegee Army Airfield , intermittently snapping or uprooting numerous young softwood trees, and continued across Macon County Road 56. The tornado then seemed to intensify somewhat as it approached Alabama Highway 199, where 10 to 20 mature pine trees were snapped. The tornado quickly weakened and dissipated just east of Highway 199 in the vicinity of Bulger Creek.</p>				
<hr/>				
TALLAPOOSA COUNTY --- 2.0 W CHURCH HILL [32.65, -85.84], 1.5 NW CHURCH HILL [32.67, -85.81]				
	04/05/22 10:22 CST		0	Tornado (EF0, L: 1.75 mi , W: 110 yd)
	04/05/22 10:25 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southern Tallapoosa County and determined that it was consistent with an EF 0 tornado, with maximum winds near 80 mph. An weak tornado touched down along a Buck Creek just southwest of Buck Creek Road. Damage consisted mainly of downed trees with some structural damage caused by fallen trees/limbs. The tornado dissipated about one-third of a mile northeast of the intersection of Wildlife Road and Deer Path Road.</p>				
<hr/>				
MONTGOMERY COUNTY --- 3.6 SE CURRY [31.98, -86.04], 5.3 ESE CURRY [31.99, -86.00]				
	04/05/22 10:34 CST		0	Tornado (EF0, L: 2.39 mi , W: 550 yd)
	04/05/22 10:38 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southeast Montgomery County and determined that it was consistent with an EF 1 tornado, with maximum winds near 100 mph. The tornado touched down near Highway 94. It tracked east were several trees were uprooted along Highway 231. Numerous trees were snapped in the front yard of a home on Old Highway 231 where the greatest degree of tree damage was found, but this home was not able to be accessed due to the amount of trees covering the driveway. Other nearby homes only received minor roof or siding damage. The tornado crossed into Pike County just north of Jackson Creek.</p>				
<hr/>				
PIKE COUNTY --- 1.5 N ORION [31.99, -86.00], 2.9 SE CHINA GROVE [32.01, -85.91]				
	04/05/22 10:38 CST		0	Tornado (EF0, L: 5.17 mi , W: 550 yd)
	04/05/22 10:45 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in northern Pike County and determined that it was consistent with an EF 0 tornado, with maximum winds near 85 mph. This tornado started in southeast Montgomery County and crossed into Pike County just north of Jackson Creek. The tornado tracked eastward over rural areas with damage consisting mainly of uprooted trees.</p>				
<hr/>				
CHAMBERS COUNTY --- 0.7 NW BLACKMAN [32.88, -85.53], 0.8 NNW BLACKMAN [32.88, -85.52]				
	04/05/22 10:45 CST		0	Tornado (EF0, L: 0.44 mi , W: 200 yd)
	04/05/22 10:46 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in western Chambers County and determined that it was consistent with an EF 0 tornado, with maximum winds near 80 mph. A brief weak tornado touched down near County Road 33 where an outbuilding was damaged with sheet metal blown downwind. Otherwise, some trees were snapped and uprooted along the short path of the tornado.</p>				

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
BULLOCK COUNTY --- 1.2 NE ALMERIA [32.04, -85.83], 2.7 ENE ALMERIA [32.04, -85.81]				
	04/05/22 10:50 CST	0		Tornado (EF1, L: 1.58 mi , W: 600 yd)
	04/05/22 10:52 CST	0		Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in southwest Bullock County and determined that it was consistent with an EF 1 tornado, with maximum winds near 95 mph. A tornado touched down near Mascott Road and tracked eastward across Beaverdam Creek . As it approached County Road 14 in the High Ridge area, the tornado intensified and broadened, uprooting numerous softwood trees or snapping large limbs on some hardwood trees, especially alongside the road. The tornado then ascended the High Ridge area and dissipated somewhere over inaccessible land west of Alabama Highway 223.</p>				
BARBOUR COUNTY --- 2.7 NNW EUFAULA [31.92, -85.16], 1.6 SSW EUFAULA WEEDON ARPT [31.93, -85.14]				
	04/05/22 11:38 CST	0		Tornado (EF1, L: 1.54 mi , W: 200 yd)
	04/05/22 11:40 CST	0		Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in northeastern Barbour County and determined that it was consistent with an EF 1 tornado, with maximum winds near 95 mph. The tornado touched down near the northern point of the Walter F George Reservoir and tracked northeast and crossed Highway 82, where a few trees were uprooted and snapped. The tornado then crossed Highway 431, where a large pecan tree was uprooted and fell on a house, rendering it unlivable. The tornado began to weaken once it crossed Highway 431, producing mainly tree limb damage before dissipating.</p>				
ELMORE COUNTY --- 3.2 WSW DEXTER [32.61, -86.20]

JEFFERSON COUNTY --- (BHM)BIRMINGHAM ARPT [33.57, -86.75]				
	04/06/22 17:16 CST	0		Hail (0.88 in)
	04/06/22 17:17 CST	0		Source: Trained Spotter
MONTGOMERY COUNTY --- 2.4 SSE WAUGH [32.34, -86.03]				
	04/06/22 20:39 CST	0		Hail (0.75 in)
	04/06/22 20:40 CST	0		Source: Trained Spotter
<p>An upper-level disturbance moved across the Deep South in the early morning hours of April 5, 2022. This fostered the development of a surface low which moved across Central Mississippi and into North Alabama. Thunderstorms in the morning initially posed a threat of large hail and damaging winds. Later in the morning and into the afternoon, storms became more surface-based and a tornado threat resulted, mainly impacting the southern and southeastern portions of Central Alabama. On April 6th, a strong cold front moved through Alabama, producing another round of severe thunderstorms, but no tornadoes.</p>				
GREENE COUNTY --- 1.9 SW UNION [32.96, -87.94]				
	04/13/22 20:30 CST	0		Thunderstorm Wind (EG 50 kt)
	04/13/22 20:31 CST	0		Source: Emergency Manager
<p>Several trees uprooted along County Road 191.</p>

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>National Weather Service meteorologists surveyed damage in far eastern Greene County and determined that it was consistent with an EF 1 tornado, with maximum winds near 90 mph. The tornado touched down just southwest of the Branch Heights community on the south side of Eutaw. It tracked northeast across Joseph Wilder Circle causing minor roof and tree damage. It began to intensify as it moved northeastward, removing a portion of the roof of the housing authority building, and reached its maximum intensity as it moved along Levi Morrow Senior Court. At least 40 residences in the community suffered at least visible shingle damage, with a few residences suffering significant roof damage. The tornado continued northeast, causing roof damage to a business along Highway 43, and snapping and uprooting multiple trees in a park as it crossed Highway 14 and at the Finches Ferry Road. The tornado then crossed into Hale County near the dead end of Finches Ferry Road.</p>				
<hr/>				
HALE COUNTY --- 4.9 W EVANSVILLE [32.84, -87.83], 1.4 SE CYPRESS [32.94, -87.63]				
	04/13/22 20:40 CST		0	Tornado (EF1, L: 13.26 mi , W: 400 yd)
	04/13/22 20:56 CST		0	Source: NWS Storm Survey
<p>National Weather Service meteorologists surveyed damage in western Hale County and determined that it was consistent with an EF 1 tornado, with maximum winds near 90 mph. This tornado originated in near Eutaw in Greene County and crossed into Hale County at the Black Warrior River near Finches Ferry Road. In Akron, several trees were uprooted and an apartment building suffered minor roof damage. The tornado continued to cause occasional tree damage as it moved just north of Highway 60. Multiple trees were then uprooted along Cedarwood Road. After this point, discerning the tornado path from sporadic tree damage caused by straight line winds in the bowing segment became difficult, but the tornado appears to have dissipated prior to crossing Highway 69.</p>

A tree was blown down along Highway 51 North.

COFFEE COUNTY --- 0.9 SW ENTERPRISE [31.31, -85.85]

04/05/22 11:55 CST	0	Thunderstorm Wind (EG 50 kt)
04/05/22 11:55 CST	0	Source: Broadcast Media

A few trees were blown down.

HENRY COUNTY --- 0.6 SE KIRKLAND CROSSROADS [31.39, -85.40], 2.4 NNW HEADLAND [31.38, -85.36]

04/05/22 12:24 CST	0	Tornado (EF0, L: 2.77 mi , W: 50 yd)
04/05/22 12:27 CST	0	Source: NWS Employee

A small tornadic debris signature (TDS) was present and moved southeastward before dissipating. A few trees were blown down in the area, but no structures were impacted in this rural area.

HENRY COUNTY --- TUMBLETON [31.40, -85.25]

04/05/22 12:33 CST	0	Thunderstorm Wind (EG 50 kt)
04/05/22 12:33 CST	0	Source: Broadcast Media

Trees were blown down near Tumbleton.

GENEVA COUNTY --- 2.7 WNW MALVERN [31.14, -85.55], 0.3 ENE LIGHT [31.14, -85.49]

04/05/22 12:38 CST	75K	Tornado (EF0, L: 3.92 mi , W: 200 yd)
04/05/22 12:43 CST	0	Source: NWS Storm Survey

An EF0 tornado initially tracked through portions of Malvern, AL. The path began near Firecracker Road where some minor damage was found. The tornado then crossed the Magnolia Grove Mobile Home Community along Wynwood Ln where more notable damage occurred. The stairway of one home was displaced about 5 ft from the front door. An adjacent mobile home suffered major roof loss, while another near the community entrance had a wooden projectile impale its side. The tornado then caused some damage along County Road 93 between Malvern Highway and East College Avenue where mostly broken tree limbs were found. Additional damage occurred in portions of Rehobeth along Branton Road near South Park Avenue, mostly to a few outbuildings with a large uprooted tree leaning against a home. The end point is near Porter Road just off County Road 203 where two large oak trees were uprooted at two neighboring properties. One large tree trunk also snapped and fell on top of a home's living room. The max estimated winds were 85 mph.

GENEVA COUNTY --- 1.4 N MALVERN [31.15, -85.51], 1.2 N MALVERN [31.15, -85.51]

04/05/22 12:39 CST	3K	Tornado (EF1, L: 0.19 mi , W: 50 yd)
04/05/22 12:40 CST	3K	Source: NWS Storm Survey

A very brief tornado touched down in a field just northwest of Malvern Highway and Scott Road. The tornado caused damage to crops in the field and then destroyed a rather well build carport, pulling anchor bolts from concrete and lag bolts from wooden posts. The tornado quickly dissipated before crossing Malvern Highway. This tornado was rated EF1 with max winds estimated at 90 mph.

HOUSTON COUNTY --- 2.0 SW TAYLOR [31.14, -85.49], 0.5 WNW REHOBETH [31.13, -85.44]

04/05/22 12:43 CST	75K	Tornado (EF0, L: 2.92 mi , W: 200 yd)
04/05/22 12:47 CST	0	Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>This is a continuation of a tornado that started in Geneva county. An EF0 tornado initially tracked through portions of Malvern, AL. The path began near Firecracker Road where some minor damage was found. The tornado then crossed the Magnolia Grove Mobile Home Community along Wynwood Ln where more notable damage occurred. The stairway of one home was displaced about 5 ft from the front door. An adjacent mobile home suffered major roof loss, while another near the community entrance had a wooden projectile impale its side. A third tornado briefly swept through a small area in Cowarts, along the north side of US-84. The main damage were a few uprooted large trees, a couple of which fell onto the side of a home and on top of a parked car. Other trees in the vicinity sustained more minor damage and a couple of neighboring outbuildings had some roof panels stripped. These damages are consistent with an EF0 with max winds estimated at 85 mph.

HOUSTON COUNTY --- 1.2 W COWARTS [31.20, -85.32]

	04/05/22 08:03 CST		0	Tornado (EF2, L: 9.46 mi , W: 800 yd)
	04/05/22 08:14 CST		0	Source: NWS Storm Survey

A strong EF2 tornado touched down on the Choctaw County side of the Tombigbee River on 4/5/22 at 9:03 AM CDT. Aerial survey revealed the tornado rapidly widened and intensified as it crossed the river, reaching its peak intensity and width on the Clarke County side at 130 mph and 800 yards in width. The forest along and east of the river was mowed down with countless hardwood and softwood trees snapped/uprooted. The tornado continued towards West Bend Road where it produced EF1 damage over a wide swath around 550 yards wide. The tornado entered a very distinct multi vortex phase with three notable convergent damage patterns with snapped softwood/hardwood trees at this point. This continued east-northeast to Highway 69 where the tornado remained somewhere between 500 to 600 yards wide as a multi-vortex doing EF1 damage, snapping several hardwoods/softwoods and causing some minor to moderate roof damage to homes. As the tornado moved northeast towards Bethel Road, it weakened and narrowed in size considerably only doing a small swath of EF0 damage. The tornado then turned right towards the east and re-intensified into an EF1 at Friendship Road with winds upwards of 95 mph as it snapped several softwood trees. After this, the tornado weakened quickly coming to an end on Smyer Road where only a couple snapped softwood trees were noted. A special thanks to Alabama Law Enforcement Agency and Clarke County EMA for conducting the aerial survey to help ascertain the peak width and intensity of the tornado.

CLARKE COUNTY --- 4.3 NE COFFEEVILLE [31.80, -88.05], 3.5 WSW MC ENTYRE [31.81, -88.03]

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/05/22 08:10 CST		0	Tornado (EF1, L: 1.83 mi , W: 100 yd)
	04/05/22 08:13 CST		0	Source: NWS Storm Survey

A unique, brief satellite tornado began south of the Clarke County EF2 tornado on 4/5/22 at approximately 9:10 AM CDT. This satellite tornado produced EF1 damage where several softwood trees were snapped/uprooted on Ice Plant Road. The tornado continued east-northeast impacting a barn where there was significant loss of roofing material and side covering. The tornado also uprooted a large oak tree at this location. The tornado then quickly turned east crossing Bethel Road and reaching Smyer Road as an EF0 snapping a couple softwood trees. The tornado completed its arc around the southern periphery of the EF2 tornado with the satellite tornado tracking due north along Smyer Road just before Friendship Road, lifting just shy of the primary tornado circulation. EF0 damage with a couple uprooted softwood trees were the last observable damage at this point.

CLARKE COUNTY --- GROVE HILL [31.70, -87.78]

High winds downed trees at Camden Bypass and Dees and Packer Roads.

MONROE COUNTY --- 0.8 NNW TURNBULL [31.73, -87.14], 1.8 NNE TURNBULL [31.74, -87.11]

04/05/22 09:10 CST	0	Tornado (EF1, L: 1.52 mi , W: 75 yd)
04/05/22 09:13 CST	0	Source: NWS Storm Survey

A brief EF1 tornado occurred on 4/5/22 at 10:10 AM CDT in northeast Monroe County just west northwest of Riley, AL. The tornado began along Highway 21 North where many hardwood trees were uprooted. The next observable damage point was north northeast of Riley once again on Highway 21 North at Flat Creek where there were multiple snapped softwood trees supporting a peak intensity of EF1 at 100 mph. The tornado may have continued northeast from here, however due to limited road access the end point is estimated just northeast of the prior observable damage point.

CRENSHAW COUNTY --- 1.6 NNW PETREY [31.87, -86.21], 2.3 N PETREY [31.88, -86.19]

Storm Data and Unusual Weather Phenomena - April 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/05/22 09:56 CST		0	Tornado (EF2, L: 1.34 mi , W: 250 yd)
	04/05/22 09:59 CST		0	Source: NWS Storm Survey

A brief yet strong EF2 tornado occurred on 4/5/22 in Crenshaw County by Petrey, AL at 10:56 AM CDT. The tornado began just before Lapine Highway where it uprooted and snapped several softwood trees. The tornado crossed the Highway, gradually widening and causing some damage to the roof of a church while continuing to snap and uproot softwood trees. The tornado quickly impacted a chicken farm off of Shady Grove Road where one chicken house was completely destroyed supporting the initial EF2 damage location. As the tornado continued northeast, the radius of EF2 winds widened considerably. Winds peaked around 125 mph in the adjacent forest resulting in complete devastation of approximately 20 to 30 acres of trees where numerous snapped softwoods and snapped or uprooted hardwoods were observed. As the tornado approached Smith Chapel Road, it began to quickly shrink in size and weaken uprooting or snapping a handful of trees with no notable damage after it crossed the road.

CRENSHAW COUNTY --- 4.0 NNW RUTLEDGE [31.78, -86.35]

CRENSHAW COUNTY --- 1.6 NNW PETREY [31.87, -86.21], 1.8 N PETREY [31.88, -86.21]

	04/05/22 10:20 CST		0	Tornado (EFU, L: 0.43 mi , W: 25 yd)
	04/05/22 10:21 CST		0	Source: NWS Storm Survey

After extensive analysis of data provided by PERILs, sentinel satellite imagery, and third-party pressure data in conjunction with multiple surrounding radars it has been determined that another tornado occurred 1 mile NNW of Petrey, AL on 4/5/2022. This tornado was associated with the line segment that was moving through the area roughly 25 minutes after the initial tornado producing supercell. During the initial storm survey there were several discrepancies noted in the overall damage path that did not quite line up with the initial tornado path including snapped/uprooted trees by a pond and the damage done to the southern portion of the chicken houses. Given the overlapping paths and likely similar start points, it is impossible to determine what the true intensity, path width, path length, and end point of this tornado was. The beginning time of the tornado is estimated by radar and third party pressure data. Special thanks to all parties involved for providing invaluable data that supported this determination.

ESCAMBIA COUNTY --- 3.0 NNW KIRKLAND [31.22, -87.05]

	04/05/22 10:55 CST		0	Thunderstorm Wind (EG 52 kt)

High winds downed trees on Baggett Street.

A very active Spring severe weather season continued in April. A very strong storm system and associated cold front swept across the area during the morning of April 5th. A very unstable atmosphere combined with strong wind shear led to a severe weather outbreak across portions of the deep south. Eight tornado tracks were found along with other areas of wind damage and large hail.

	04/17/22 21:40 CST		0	Source: Emergency Manager
Public relayed pictures of numerous snapped trees, a destroyed shed and a blown over car port. The winds were estimated to be 90 to 100 mph based off of damage indicators.				
A very moist and unstable environment developed ahead of an approaching cold front. As this front entered the area during the evening hours, it triggered severe thunderstorms that produced tornadoes, large hail and damaging winds.
