Period of Record Information

Harrison, Arkansas

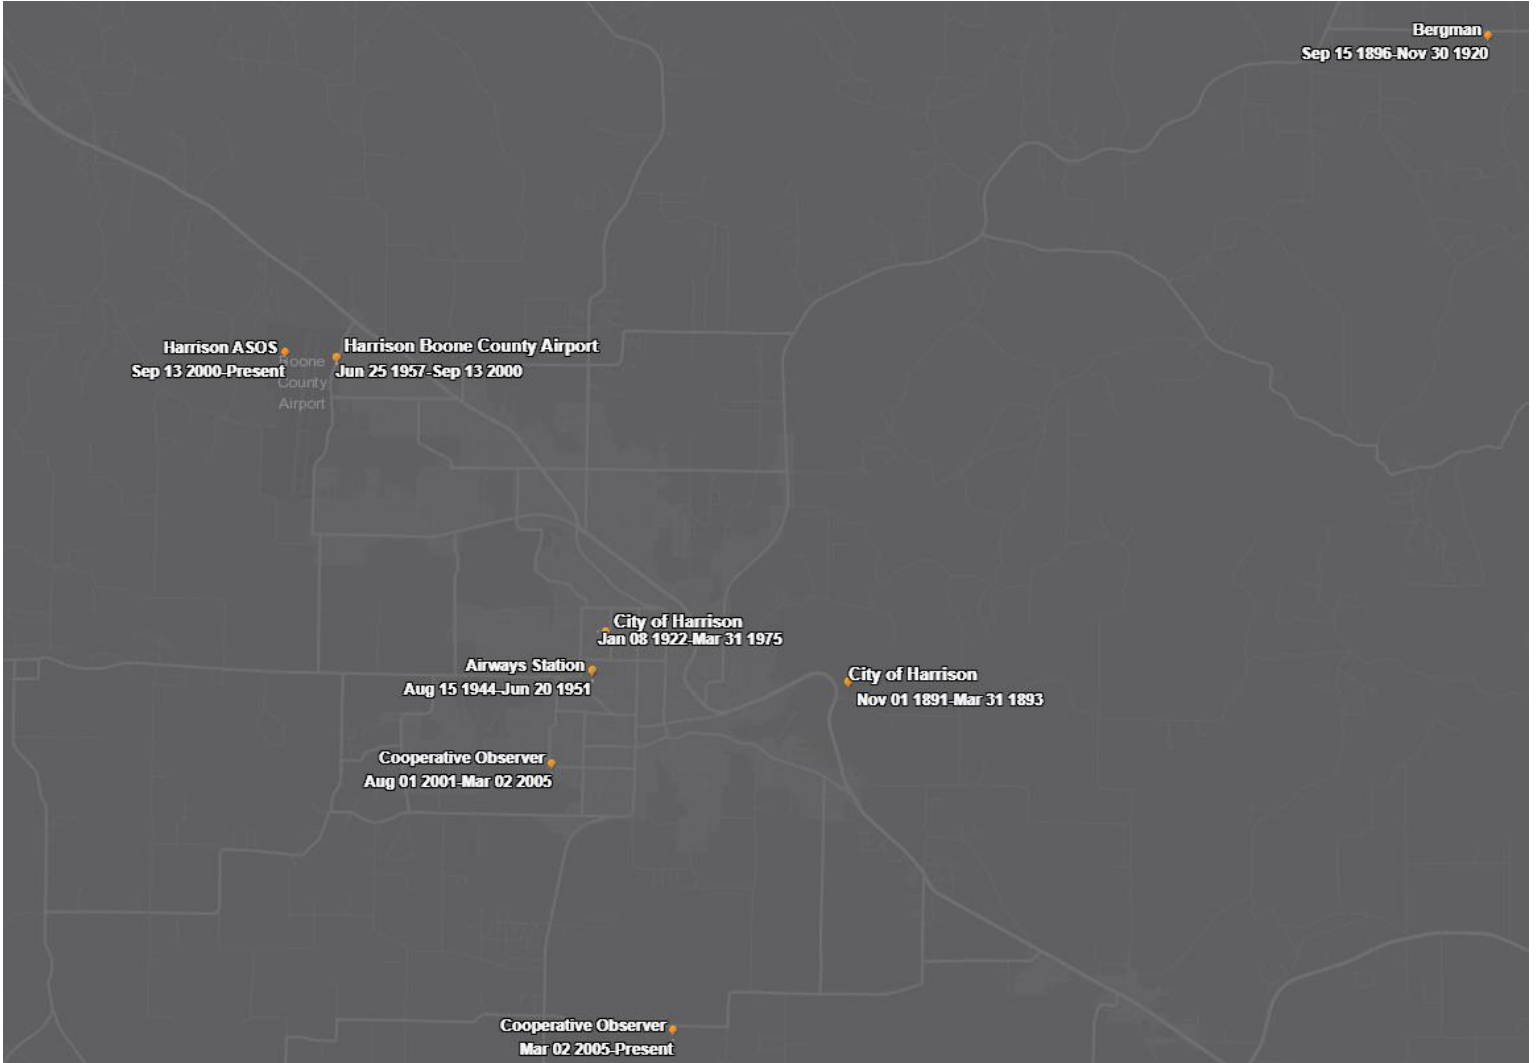

All Data	01 Nov 1891 to Present
Notes:	
01 Nov 1891 to 28 Feb 1975	All data is from the Harrison cooperative observer site. However, between 1950 and 1975, some snowfall data was deemed unreliable, so airport data were used.
01 Mar 1975 to 31 Jul 2001	All data is from Harrison Boone County Airport
01 Aug 2001 to Present	All temperature and rainfall data is from the Harrison Boone County Airport. Snowfall and snow depth data are from the supplemental cooperative observer station. Also, when airport data are unavailable, data from the coop site is used.

Harrison, Boone County, Arkansas is located in the north-central section of the state in the Ozark highland area. The terrain is very hilly. The principal business section of Harrison is in a valley at an elevation of about 1,050 feet above sea level, with the airport on the northwest side of town at 1,374 feet above sea level.

The first official weather observations were taken at Harrison beginning in November of 1891, and continuing through March of 1893. From 1896 to 1920, the station was located at Bergman, 9 miles northeast of Harrison. From 1922, the station was located in the city of Harrison, generally within a couple of miles of the Post Office. The cooperative observer station closed on March 31, 1975.

On August 15, 1944, an airways station was established for aviation purposes. This was at a private residence within the city. The airway station closed in 1951, but re-opened as a Supplementary Aviation Weather (SAWRS) station in 1957, this time at Boone County Airport. In September 1961, the station became a Federal Aviation Administration (FAA) Flight Services station, with 24-hour observations. In 1988, the site became a Federal Contract Weather Observation Site (FCWOS). On September 13, 2000, an Automated Weather Observing System (ASOS) was commissioned at the airport, bringing an end to human intervention in hourly surface observations.

A cooperative observer station was re-opened at Harrison on June 24, 2001 to supplement ASOS precipitation data, and record snowfall data. Temperature data was added from the station beginning on December 1, 2015.
