When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (NWS Instruction 10-924)

An X inside this box indicates that no river flooding occurred within this hydrologic service area.

The spigot dried up in April as upper-level ridging began developing in the synoptic pattern, and cold fronts began dropping off. As a result, precipitation came in below-normal. Consequently, no hydrologic events were reported.
