Summary of Impacts

Links: See/submit [Condition Monitoring Observer Reports \(CMOR\)](#) and view the [Drought Impacts Reporter](#)

Hydrologic Impacts

- Stream flows are extremely below normal for the entire area.

Agricultural Impacts

- Soil moisture is between 10-30% below normal across the area.

Fire Hazard Impacts

- Tennessee Forestry has reported a notable uptick in fire activity over the last two weeks due to dry and warm conditions. Additionally the outlook for North Carolina is above normal for the rest of April.

Other Impacts

- Stay tuned for future updates.

Mitigation Actions

- Please refer to your municipality and/or water provider for mitigation information. Continue to abide by any local burning bans and regulations.

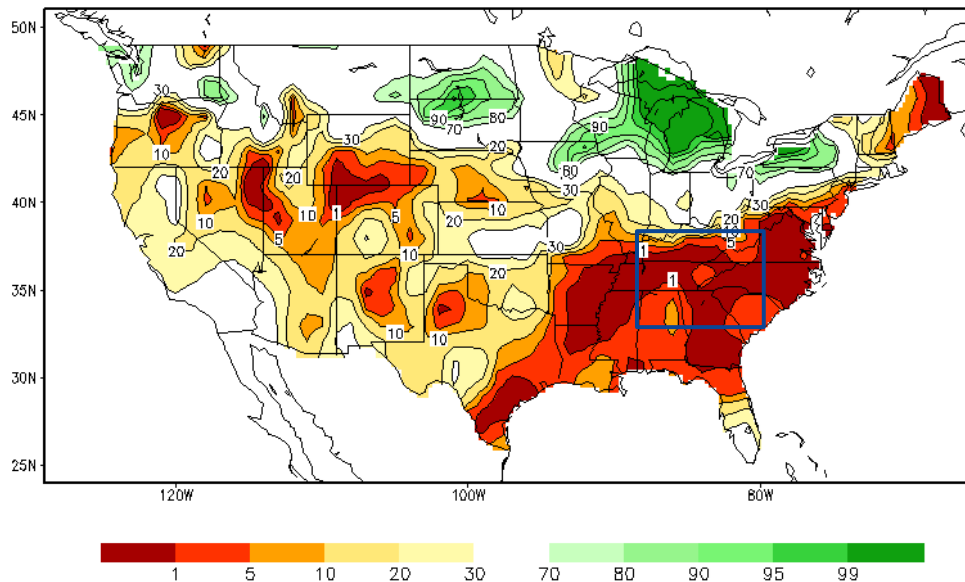

Agricultural Impacts

- Very dry soil conditions continue across most of the region.
