 Branch

Subject: Discontinuation of the Max/Min Temperature and Precipitation Table Product (RTP) for National Weather Service (NWS) Honolulu Forecast Office (HFO): Effective September 2, 2025

Effective September 2, 2025, the National Weather Service (NWS) will discontinue the Max/Min Temperature and Precipitation Table Product (RTP) for the Honolulu Forecast Office (HFO).

The RTP is a text product that provides maximum and minimum temperatures and precipitation totals for the state of Hawai'i.

The information in the RTP duplicates information in other NWS text products, various websites, and NWS application programming interfaces (API).

HFO local products providing the data contained in the RTP product include:

- Public Information Statements (PNS) for summaries of temperatures and precipitation during significant weather events.
- Local Storm Reports (LSR) for event-driven rainfall reports.
- Record Event Reports (RER) for record event reporting.
- Daily Climate (CLI) Text Products for routine climate reports.
- Daily Summary Messages (DSM) Automated Surface Observing System (ASOS) Text Products for daily summaries of temperature and precipitation from which the current RTP and CLI are constructed.
- Hydrometeorological Data Report (RR3) for cooperative observations.
- METAR Products (MTR) for routine METAR observations with temperature and precipitation data.

Alternative websites providing the data contained in the RTP product include:

- NWS HFO Online Weather Data:
<https://www.weather.gov/wrh/Climate?wfo=hfo>

- NWS Weather API:
<https://www.weather.gov/documentation/services-web-api>

- Aviation Weather Center API:

<https://aviationweather.gov/data/api/#/>

Operational NWS product affected by this change:

Product Name	WMO Heading	AWIPS ID
-----	-----	-----
Max/Min Temperature and Precipitation Table for Hawai'i	ASHW60 PHFO	RTPHI
