              Other NWS Partners, Users, and Employees

From:       Terrance J. Clark, Director  
              NWS WSR-88D Radar Operations Center

Subject: TDWR Supplemental Product Generator Identifier Change from TPBI  
to TDJT: Effective August 3, 2026

On or around August 3, 2026 the Radar Operations Center will change the identifier for the Supplemental Product Generator (SPG) associated with the Federal Aviation Administration's (FAA's) Terminal Doppler Weather Radar (TDWR), PBI.

With the FAA's official name change of the airport, the SPG identifier for site TPBI (Palm Beach International Airport) will change to TDJT (President Donald J. Trump International Airport), affecting externally disseminated Level 2 data and Level 3 products from this radar. New identifier, DJT will be used wherever PBI currently appears.

Users of TDWR SPG data from TPBI should update their systems to reflect the identifier change. Once the new identifier has been implemented, data will be transmitted and archived with site identifier, TDJT.

If you have questions, please contact:
