### MCCLAIN COUNTY --- 3.0 NW GOLDSBY [35.18, -97.51], 2.2 N GOLDSBY [35.18, -97.48]

	10/21/17 19:36 CST		0.10M	Tornado (EF1, L: 2.00 mi , W: 50 yd)
	10/21/17 19:40 CST		0	Source: NWS Storm Survey

This tornado developed just north of State Highway 9 and just west of Santa Fe Avenue where tree damage was noted. The tornado moved east damaging a business and destroying a shed along Highway 9. The tornado turned southeast crossing Highway 9 and passed near the Riverwind Casino and Hotel along with strong winds on the south flank of the tornado. Trees were snapped just west of the casino. At the casino, two air conditioner units were displaced from their pedestal on the roof of the building, which allowed rain inside the structure. Some roof facade damage was also noted at the casino. Just south at the adjacent hotel, strong winds created some roof facade and siding damage ( see adjacent Thunderstorm Wind Entry).

The tornado crossed Interstate 35 and damaged businesses and destroyed at least one shed between the interstate and the Canadian River before moving into inaccessible areas near the river and crossing into Cleveland County south of Norman.

---

### MCCLAIN COUNTY --- 2.5 NNW GOLDSBY [35.18, -97.50], 2.2 N GOLDSBY [35.18, -97.48]

	10/21/17 19:37 CST		10K	Thunderstorm Wind (EG 78 kt)
	10/21/17 19:40 CST		0	Source: NWS Storm Survey

Immediately south of the tornado that moved near State Highway 9, a large area of damaging winds, likely associated with the Rear Flank Downdraft, produced additional damage from near Riverwind Casino and Hotel to the Canadian River. Just east of Interstate 35, this area of damaging winds was it's widest at around 500 yards. Roof facade was pulled from the Riverwind Hotel, which damaged the hotel siding and broke a first story window as it fell. Numerous trees were damaged east of Interstate 35 but south of the tornado path with damage consistent with winds of approximately 90 mph.

### CLEVELAND COUNTY --- 3.4 SW NORMAN [35.18, -97.48], 3.0 SSW NORMAN [35.18, -97.45]

	10/21/17 19:40 CST		2K	Tornado (EF0, L: 1.40 mi , W: 20 yd)
	10/21/17 19:42 CST		0	Source: NWS Storm Survey

The tornado moved into Cleveland County in inaccessible areas along the Canadian River and generally remained south of the neighborhoods in south Norman south of Highway 9. Some tree and fence damage was observed at the southern end of South Canadian Trails which is where the tornado is believed to have dissipated.

<p>This tornado developed on the northwest side of Seminole near the U.S. Highway 270 and Reid Street, and move southeast through town dissipating near U.S. Highway 270 and 7th Street. Most of the damage was tree damage with many trees snapped or uprooted, especially in the Maple Grove Cemetery on the northwest side of town. However, a few homes and other buildings also received roof damage including one home where much of the roof was pulled off. One family was trapped in their storm cellar when a tree fell on the cellar door. Near downtown, a church received roof damage and portions of the roof were impaled in the siding of nearby businesses.</p>
