Storm Data and Unusual Weather Phenomena - May 2026

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	05/09/26 20:36 CST		0	Thunderstorm Wind (MG 59 kt)
	05/09/26 20:36 CST		0	Source: Amateur Radio

The location is approximate.

The passage of a southeastward-moving upper system (and associated surface front) fostered scattered severe thunderstorms during the evening of the 9th, focused across portions of western Oklahoma. Large to very large hail was the main storm hazard amid steep lapse rates and strong wind shear, sufficient for supercells. Focused areas of wind damage occurred near Sayre and northeast of Lawton as well.

CARTER COUNTY --- 1.0 N ARDMORE [34.18, -97.14]

05/10/26 07:45 CST	0	Hail (0.88 in)
05/10/26 07:45 CST	0	Source: Public

An image was shared on social media. The location is approximate, and the event time is estimated based on radar observations.

A lingering convective complex from the prior evening (9th), along with modest warm ascent, fostered continued strong thunderstorm activity across portions of southern Oklahoma during the morning of the 10th. A few stronger thunderstorm cores produced reports of small hail.

BECKHAM COUNTY --- TEXOLA [35.22, -99.99]

05/15/26 16:40 CST	0	Thunderstorm Wind (EG 61 kt)
05/15/26 16:40 CST	0	Source: Fire Department/Rescue

Significant damage to trees and an older brick building occurred in Texola. The location is approximate, and the event time is estimated based on radar observations and wind gust data at the nearby Erick (ERIC) Mesonet.

An image was shared. The location is approximate, and the event time is estimated based on radar observations.

WICHITA COUNTY --- 5.1 S WICHITA FALLS [33.84, -98.49]

05/08/26 21:45 CST	0	Hail (0.75 in)
05/08/26 21:45 CST	0	Source: Public

The report was relayed through mPING.

WICHITA COUNTY --- 6.5 SSE PLEASANT VALLEY [33.85, -98.58]

05/08/26 21:47 CST	0	Hail (0.75 in)
05/08/26 21:47 CST	0	Source: Public

The report was relayed through mPING.

Scattered severe thunderstorms developed along a cold front across portions of northern and central Oklahoma during the afternoon of the 8th, spreading southward into southern Oklahoma and western-north Texas through the evening. Large to very large hail was the main storm hazard with several supercell thunderstorms during this time.

BAYLOR COUNTY --- 6.7 SE SEYMOUR [33.54, -99.16]

05/22/26 21:15 CST	0	Hail (0.75 in)
05/22/26 21:15 CST	0	Source: Public

The report was relayed through mPING.

A slowly decaying line of thunderstorms across western-north Texas produced strong winds and small hail during the very late evening of the 22nd.
