## October 2024 Climate Summary for West Central and Southwest Florida

October 2024 started out rather hot and humid, but during the second week Hurricane Milton moved across the area followed by some drier air and more seasonable temperatures. As a result, temperatures averaged slightly below to slightly above normal for the month.

Rainfall in October 2024 was well above normal across much of the area thanks to Hurricane Milton, with some locations setting a new daily and a new monthly rainfall record for October. However, a few of these sites did fail during the Milton and the total amount during the event is unknown. As can be seen in the images below the table much of the Nature Coast south through Tampa Bay and the Interstate 4 corridor ended up more than 300 percent of normal (purple areas on right image), with some locations over 600 percent of normal (fuchsia color on right image).
