shingles were removed from several homes, and power lines were blown down. The high wind seemed to have been supported by an area of dissipating showers that moved through the region. These showers seemed to have helped the downward transport of high wind in the low level jet to the ground.

04/24/14 02/30 CST	(OK-Z061) ROGERS, (OK-Z062) N	MAYES, (OK-Z069) ADAIR			
Wind damage was reported across portions of Mayes, Adair, and Rogers Counties during the early morning hours of April 24th, Large tree limbs were snapped, power lines were blown down, and barns were destroyed. The high wind seemed to have been supported by an area of dissipating showers that moved through the region. These showers seemed to have helped the downward transport of high wind, in excess of 75 mph, in the low level jet to the ground. Strong thunderstorm wind blew down large tree limbs.

Severe thunderstorms developed along a dry line as it moved into eastern Oklahoma during the afternoon hours of April 27th. These storms produced large hail up to golfball size, damaging wind gusts, and two tornadoes. Additional severe thunderstorm development occurred as a cold front moved into the region during the late evening hours.
