This tornado destroyed several outbuildings, damaged homes, snapped or uprooted numerous trees, and blew down power poles. Based on this damage, maximum estimated wind in the tornado was 100 to 110 mph.

FRANKLIN COUNTY --- 2.5 SSE TONEY [35.49, -93.96], 0.7 SSW WHITE OAK [35.54, -93.88]

	04/27/16 00:18 CST		0.10M	Tornado (EF0, L: 5.90 mi , W: 700 yd)
	04/27/16 00:24 CST		0	Source: NWS Storm Survey

This tornado damaged chicken houses, damaged several homes, destroyed an outbuilding, and snapped numerous large tree limbs. Based on this damage, maximum estimated wind in the tornado was 75 to 85 mph.

FRANKLIN COUNTY --- 0.9 SW TONEY [35.51, -93.98]

	04/27/16 00:19 CST		0	Thunderstorm Wind (EG 65 kt)
	04/27/16 00:19 CST		0	Source: NWS Storm Survey

Strong thunderstorm wind snapped large tree limbs.

FRANKLIN COUNTY --- 2.0 ESE TONEY [35.51, -93.94]

	04/27/16 00:19 CST		5K	Thunderstorm Wind (EG 65 kt)
	04/27/16 00:19 CST		0	Source: NWS Storm Survey

Strong thunderstorm wind damaged an outbuilding.

Thunderstorms developed during the afternoon hours of the 26th, along and ahead of a dry line that had moved into western Oklahoma. These storms quickly became severe as they moved eastward into very unstable air during the late afternoon and evening hours. The storms formed into a squall line over central Oklahoma during the evening. Ahead of this squall line over northwestern Arkansas, very strong low level wind shear had developed as the low level jet strengthened across the area. As a result of this strong wind shear, coupled with moderately strong instability that persisted well into the overnight hours, this squall line was able to produced multiple tornadoes and widespread damaging wind as it moved across northwestern Arkansas during the early morning hours of the 27th.

SEBASTIAN COUNTY --- 1.5 SE FT SMITH [35.36, -94.40]

	04/29/16 15:10 CST		0.10M	Hail (1.75 in)
	04/29/16 15:10 CST		0	Source: Trained Spotter

SEBASTIAN COUNTY --- 1.1 NE FT SMITH [35.39, -94.41]

Storm Data and Unusual Weather Phenomena - April 2016

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/29/16 15:17 CST		0.15M	Hail (2.50 in)
	04/29/16 15:17 CST		0	Source: Trained Spotter

Tennis ball size hail broke windows, damaged the roofs of homes and businesses, and damaged vehicles.

CRAWFORD COUNTY --- 0.6 NNE VAN BUREN [35.44, -94.34]

	04/29/16 15:21 CST		0.10M	Hail (1.75 in)
	04/29/16 15:21 CST		0	Source: Trained Spotter

CRAWFORD COUNTY --- 0.5 ESE ALMA [35.48, -94.22]

	04/29/16 15:28 CST		25K	Hail (1.75 in)
	04/29/16 15:28 CST		0	Source: Trained Spotter

A warm front over northern Texas and Louisiana moved northward into southeastern Oklahoma and southwestern Arkansas during the day on the 29th, as a strong upper level disturbance translated into the Southern Plains. Strong to severe thunderstorms developed over portions of northwestern Arkansas to the north of this approaching frontal boundary during the afternoon and evening hours. Hail up to tennis ball size occurred with the strongest storms.

Strong thunderstorm wind damaged buildings in town.				

Storm Data and Unusual Weather Phenomena - April 2016

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Thunderstorms developed over northeastern Oklahoma during the late morning and early afternoon hours of the 26th, as a weak upper level disturbance passed through the area. The storms produced small hail over portions of northeastern Oklahoma.

By late afternoon, the atmosphere over central and eastern Oklahoma had become very unstable. Thunderstorms developed along and ahead of a dry line that had moved into western Oklahoma. These storms quickly became severe as they moved eastward during the late afternoon and evening hours. The storms formed into a very organized squall line over central Oklahoma during the evening. Ahead of this squall line over eastern Oklahoma, very strong low level wind shear had developed as the low level jet strengthened across the area. As a result of this strong wind shear, coupled with moderately strong instability that persisted well into the overnight hours, this squall line was able to produce numerous tornadoes and widespread damaging wind as it moved across eastern Oklahoma.

OTTAWA COUNTY --- 6.8 WNW NORTH MIAMI [36.94, -95.00], 3.1 WSW MIAMI [36.86, -94.93], 1.8 SE MIAMI [36.86, -94.86], 4.6 WNW NORTH MIAMI [36.94, -94.96]

	04/28/16 22:00 CST	0	Flood (due to Heavy Rain)
	04/30/16 23:59 CST	0	Source: Official NWS Observations

The Neosho River near Commerce rose above its flood stage of 15 feet at 11:00 pm CDT on April 28th. The river crested at 18.39 feet at 2:00 pm CDT on the 30th, resulting in moderate flooding. The river remained in flood through the end of April, falling below flood stage at 5:30 am CDT on May 1st.

A squall line moved through southeastern Kansas and eastern Oklahoma during the evening of the 26th and early morning hours of the 27th. Widespread rainfall amounts of 1 to 1.5 inches occurred across much of northeastern Oklahoma, while 2.5 to 4.5 inches of rain occurred across much of southeastern Kansas. This widespread heavy rainfall resulted in moderate flooding of the Neosho River at Commerce.

PITTSBURG COUNTY --- 2.6 S BREWER [34.78, -95.85]

	04/29/16 19:29 CST		10K	Thunderstorm Wind (EG 75 kt)
	04/29/16 19:29 CST		0	Source: NWS Storm Survey

Strong thunderstorm wind damaged outbuildings and snapped the trunks of a few trees.

A warm front over northern Texas moved northward into southeastern Oklahoma during the day on the 29th, as a strong upper level disturbance translated into the Southern Plains. Strong to severe thunderstorms developed over portions of eastern Oklahoma to the north of this approaching frontal boundary during the afternoon and evening hours. Hail up to tennis ball size occurred with the strongest storms as well as damaging downburst wind.
