The Neosho River near Commerce rose above its flood stage of 15 feet at 8:15 pm CDT on August 4th. The river crested at 18.95 feet at 3:00 am CDT on the 7th, resulting in moderate flooding. The river fell below flood stage at 1:30 pm CDT on the 10th.

Several thunderstorm complexes, each producing heavy rainfall, moved across southeastern Kansas and northeastern Oklahoma during the first ten days of August, resulting in total rainfall amounts for the period across the area exceeding ten inches in some areas. This locally heavy rainfall resulted in moderate flooding of the Neosho River near Commerce.

Significant street flooding occurred	across town. A swift water rescue occurred	I near the Eastland	Shopping Center.			

A slow moving cold front focused thunderstorms that produced heavy rainfall across portions of eastern Oklahoma on the 13th. The prolonged nature of the precipitation in some areas resulted in localized flash flooding.
