<p>Strong thunderstorm wind blew down several trees.</p>				
CRAWFORD COUNTY --- ALMA [35.48, -94.23]				
	07/09/20 10:25 CST	0		Thunderstorm Wind (EG 61 kt)
	07/09/20 10:25 CST	0		Source: Broadcast Media
<p>Strong thunderstorm wind blew down a tree.</p> <p>Thunderstorms moved southeast from eastern Kansas during the morning of the 9th. The storms moved through northwestern Arkansas during the mid to late morning, with the strongest storms producing damaging wind gusts.</p>				
(AR-Z019) CRAWFORD, (AR-Z020) FRANKLIN, (AR-Z029) SEBASTIAN				
	07/11/20 12:00 CST	0		Excessive Heat
	07/11/20 20:00 CST	0		
<p>A large ridge of high pressure over the southern United States during the middle of July set the stage for excessive heat across the region. Temperatures in the middle to upper 90s, combined with high humidity, resulted in heat indices of 110 to 115 degrees across west central Arkansas during the afternoon of the 11th.</p>				
BENTON COUNTY --- 2.1 W OSAGE MILLS [36.28, -94.31]				
	07/11/20 19:53 CST	0		Thunderstorm Wind (MG 55 kt)
	07/11/20 19:53 CST	0		Source: ASOS
<p>The ASOS at Northwest Arkansas Regional Airport (XNA) measured 63 mph thunderstorm wind gusts.</p>				
WASHINGTON COUNTY --- SUMMERS [35.98, -94.48]				

Storm Data and Unusual Weather Phenomena - July 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	07/11/20 20:11 CST		0	Thunderstorm Wind (EG 61 kt)
	07/11/20 20:11 CST		0	Source: Emergency Manager

Strong thunderstorm wind blew down a few trees.

WASHINGTON COUNTY --- LINCOLN [35.95, -94.42]

	07/11/20 20:14 CST		5K	Thunderstorm Wind (EG 61 kt)
	07/11/20 20:14 CST		0	Source: Emergency Manager

Strong thunderstorm wind blew down trees, and damaged the roof of a home.

SEBASTIAN COUNTY --- FT SMITH [35.38, -94.42]

	07/11/20 21:20 CST		2K	Thunderstorm Wind (EG 61 kt)
	07/11/20 21:20 CST		0	Source: Law Enforcement

Strong thunderstorm wind blew down trees and power lines in and around Fort Smith.

Severe thunderstorms developed across southeastern Kansas and north central Oklahoma during the late afternoon of the 11th, as a cold front moved southward into the area. The atmosphere became extremely unstable over northwestern Arkansas ahead of the storms, and wind shear was unseasonably strong, which allowed the storms to become well-organized as they moved south across the area through the evening. The strongest storms produced damaging wind.

OKLAHOMA, Eastern

(OK-Z054) OSAGE, (OK-Z055) WASHINGTON, (OK-Z057) CRAIG, (OK-Z058) OTTAWA, (OK-Z059) PAWNEE, (OK-Z060) TULSA, (OK-Z061) ROGERS, (OK-Z062) MAYES, (OK-Z064) CREEK, (OK-Z065) OKFUSKEE, (OK-Z066) OKMULGEE, (OK-Z067) WAGONER, (OK-Z070) MUSKOGEE, (OK-Z071) MCINTOSH, (OK-Z072) SEQUOYAH, (OK-Z073) PITTSBURG, (OK-Z074) HASKELL, (OK-Z075) LATIMER, (OK-Z076) LE FLORE

	07/01/20 11:00 CST		0	Excessive Heat
	07/02/20 19:00 CST		0	

A ridge of high pressure developed into the Southern Plains in early July, setting the stage for a couple days of excessive heat. Temperatures across eastern Oklahoma in the 90s, combined with high humidity, resulted in afternoon heat indices near 110 degrees on July 1st and 2nd.

OSAGE COUNTY --- 1.0 E PAWHUSKA [36.67, -96.31]

	07/02/20 10:33 CST		0	Thunderstorm Wind (MG 50 kt)
	07/02/20 10:33 CST		0	Source: Park/Forest Service

The RAWS site east of Pawhuska measured 58 mph thunderstorm wind gusts.

TULSA COUNTY --- 2.6 W WEKIWA [36.15, -96.23]

	07/02/20 11:56 CST		2K	Thunderstorm Wind (EG 52 kt)
	07/02/20 11:56 CST		0	Source: Amateur Radio

Strong thunderstorm wind blew down power lines.

Thunderstorms moved southward into northeastern Oklahoma during the morning of the 2nd. The storms intensified and expanded in coverage during the day as they continued to develop southward into an air mass that had become moderately unstable. The strongest storms produced damaging wind.

(OK-Z049) PUSHMATAHA, (OK-Z053) CHOCTAW, (OK-Z054) OSAGE, (OK-Z055) WASHINGTON, (OK-Z056) NOWATA, (OK-Z057) CRAIG, (OK-Z059) PAWNEE, (OK-Z060) TULSA, (OK-Z061) ROGERS, (OK-Z062) MAYES, (OK-Z064) CREEK, (OK-Z065) OKFUSKEE, (OK-Z066) OKMULGEE, (OK-Z067) WAGONER, (OK-Z070) MUSKOGEE, (OK-Z071) MCINTOSH, (OK-Z072) SEQUOYAH, (OK-Z073) PITTSBURG, (OK-Z074) HASKELL, (OK-Z075) LATIMER, (OK-Z076) LE FLORE

	07/11/20 11:00 CST		0	Excessive Heat
	07/11/20 20:00 CST		0	

A large ridge of high pressure over the southern United States during the middle of July set the stage for excessive heat across the region. Temperatures in the middle to upper 90s, combined with high humidity, resulted in heat indices of 110 to 115 degrees across much of eastern Oklahoma during the afternoon of the 11th.

OTTAWA COUNTY --- 3.0 SW MIAMI [36.85, -94.92]

Storm Data and Unusual Weather Phenomena - July 2020

	07/11/20 23:47 CST		0	Source: Public
Strong thunderstorm wind snapped large tree limbs.				

Storm Data and Unusual Weather Phenomena - July 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>Severe thunderstorms developed across southeastern Kansas and north central Oklahoma during the late afternoon of the 11th, as a cold front moved southward into the area. The atmosphere became extremely unstable over eastern Oklahoma ahead of the storms. Wind fields above the ground were also unseasonably strong, which resulted in very strong deep layer wind shear across the region. The combination of the extreme instability and very strong wind shear resulted in organized severe thunderstorms that moved through eastern Oklahoma during the evening, producing widespread damaging wind and large hail. A very moist air mass combined with intense thunderstorm activity also resulted in very heavy rain rates, and localized flash flooding.</p>				
<hr/>				
OKMULGEE COUNTY --- 0.9 SW MURDELL [35.66, -95.99], 3.0 SSW OKMULGEE [35.59, -96.00], 1.9 ESE NADDOCK [35.54, -95.84], 1.9 E MORRIS ARPT [35.65, -95.82]	07/29/20 10:00 CST		0	Flash Flood (due to Heavy Rain)
	07/29/20 12:30 CST		0	Source: Fire Department/Rescue

Roads in and around Okmulgee and Morris were flooded by heavy rainfall.

Showers and thunderstorms increased across eastern Oklahoma during the morning of the 28th, and the activity persisted into the afternoon. Thunderstorms redeveloped north of I-40 by mid-evening, and more thunderstorms moved into northeastern Oklahoma from southern Kansas before midnight. This activity continued to affect northeastern Oklahoma into the early afternoon of the 29th. Unseasonably rich moisture across the region for this time of year, and multiple rounds of thunderstorms affecting some of the same areas, resulted in 2-day rainfall amounts from four to nine inches across portions of Okmulgee County. This heavy rainfall caused flash flooding.

Strong thunderstorm wind blew down a tree.

LE FLORE COUNTY --- 1.0 W POCOLA [35.23, -94.50]

	07/30/20 20:19 CST		0	Thunderstorm Wind (MG 52 kt)
	07/30/20 20:19 CST		0	Source: Trained Spotter

Thunderstorm wind gusts were measured to 60 mph by a storm spotter.

Thunderstorms developed across southeastern Oklahoma during the early evening of the 30th, as a cold front moved into the region. The atmosphere had become very unstable ahead of the front, allowing some of the storms to become severe with large hail up to quarter size and damaging wind.
