	06/18/17 05:43 CST		10K	Hail (1.75 in)
	06/18/17 05:43 CST		0	Source: Public

Strong to severe thunderstorms developed along a frontal boundary located across southeastern Nebraska during the afternoon hours of the 16th. These storms moved south and southeast across Kansas overnight on the 16th, and spread into eastern Oklahoma during the morning hours of the 17th. The strongest storms produced damaging wind and hail up to quarter size.

The morning storms dissipated as they moved into southeastern Oklahoma during the midday hours of the 17th. Another round of strong to severe thunderstorms developed over southeastern Kansas during the late evening hours of the 17th along the frontal boundary that had now moved through much of Kansas. These storms moved southeast and affected northeastern Oklahoma during the morning hours of the 18th. The strongest storms produced hail up to golfball size.

---

### MUSKOGEE COUNTY --- 2.0 N WARNER [35.53, -95.30]
