Oklahoma. The slow moving nature of the complex also resulted in widespread flash flooding across the region.

CREEK COUNTY --- 1.5 SSE SAPULPA [35.98, -96.09], 1.7 NNW KIEFER [35.97, -96.08], 1.5 SSW HILTON [36.00, -96.06], 1.2 ENE SAPULPA [36.01, -96.081

> 03/20/12 03:00 CST 0 Flood (due to Heavy Rain)

03/21/12 00:15 CST 0 Source: Official NWS Observations

The Polecat Creek near Sapulpa rose above its flood stage of 21 feet at 4:00 am CDT on March 20th. The river crested at 25.62 feet at 10:15 CDT on the 20th, resulting in moderate flooding. The river fell below flood stage at 1:15 am CDT on the 21st.

Widespread heavy rainfall fell across much of eastern Oklahoma from the 19th through the 21st as a result of a slow-moving upper level low pressure system that moved from West Texas to northeastern Texas during that period. Three to five inch rainfalls were common over the region with some areas receiving between six and nine inches. This heavy rainfall resulted in moderate flooding of the Polecat Creek near Sapulpa.

OTTAWA COUNTY --- 9.1 WNW NORTH MIAMI [36.96, -95.04], 5.3 W MIAMI [36.88, -94.98], 1.6 WNW MIAMI [36.89, -94.91], 5.1 NW NORTH MIAMI [36.97, -94.95]

The Poteau River near Panama rose above its flood stage of 29 feet at 11:30 am CDT on March 20th. The river crested at 36.43 feet at 4:15 pm CDT on the 21st, resulting in moderate flooding. The river fell below flood stage at 10:45 am CDT on the 23rd.

Widespread heavy rainfall fell across much of eastern Oklahoma from the 19th through the 21st as a result of a slow-moving upper level low pressure system that moved from West Texas to northeastern Texas during that period. Three to five inch rainfalls were common over the region with some areas receiving between six and nine inches. This heavy rainfall resulted in moderate flooding of the Poteau River near Panama.
