(AR-Z010) WASHINGTON				
	05/15/20 15:55 CST		10K	High Wind (MAX 56 kt)
	05/15/20 15:55 CST		0	

Thunderstorms developed into eastern Oklahoma during the morning of the 15th. The storms developed slowly southward during the day, with intensification noted as they moved into southeastern Oklahoma and west central Arkansas, which had become quite unstable by early afternoon. Damaging wind and large hail to quarter size occurred with strongest storms.

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A wake low developed on the north side of the southward developing thunderstorm complex during the mid afternoon. A strong pressure gradient associated with this feature resulted in strong, gusty wind developing across portions of northwestern Arkansas. Wind gusts to near 65 mph, along with some minor damage, occurred locally.

CARROLL COUNTY --- 1.0 SW OAK GROVE [36.44, -93.44]

SEBASTIAN COUNTY --- 0.6 SSE GREENWOOD [35.21, -94.27], 2.3 ESE GREENWOOD [35.21, -94.23], 4.1 ENE GREENWOOD [35.24, -94.20], 1.3 NNE GREENWOOD [35.24, -94.26]

05/22/20 22:15 CST	0	Flash Flood (due to Heavy Rain)
05/23/20 02:00 CST	0	Source: Trained Spotter

Locally heavy rainfall resulted in flooding of several creeks and streams, which flowed over rural roads in and around Greenwood.

Thunderstorms developed over western Kansas during the evening of the 21st, to the north of a low pressure system centered over the Oklahoma Panhandle. These storms moved east-southeast and organized into a squall line as they moved into eastern Oklahoma during the early morning hours of the 22nd. The strongest storms produced damaging wind and marginally severe hail across northwestern Arkansas as they moved through during the mid morning hours. Strong to severe thunderstorms redeveloped over southeastern Oklahoma and west central Arkansas during the evening near a stationary frontal boundary, as an upper level disturbance approached the region. A strongly unstable air mass across the area, combined with strong deep layer wind shear to promote the development of supercell thunderstorms, which produced large hail up to golf ball size. Locally heavy rainfall resulted in some flash flooding.

SEBASTIAN COUNTY --- 2.9 SSE WEST HARTFORD [34.96, -94.40], 1.8 SE WEST HARTFORD [34.98, -94.40]

05/25/20 16:58 CST	0	Tornado (EFU, L: 1.30 mi , W: 75 yd)
05/25/20 17:00 CST	0	Source: Official NWS Observations

A brief tornado developed in heavily-wooded terrain in southern Sebastian County. The tornado produced a tornadic debris signature on the KSRX WSR-88D, which was likely the result of tree damage, given the fact it occurred in dense forest. The area where the tornado developed was inaccessible by road, therefore the tornado was rated EF-unknown, since the damage could not be reviewed by a survey team.

SEBASTIAN COUNTY --- 1.0 W RYE HILL [35.27, -94.39]

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	05/25/20 17:29 CST		0	Thunderstorm Wind (EG 52 kt)
	05/25/20 17:29 CST		0	Source: Public

Strong thunderstorm wind snapped large tree limbs.

Thunderstorms developed during the afternoon of the 25th across southeastern Oklahoma and southwestern Arkansas, to the north of an upper level disturbance approaching the area from eastern Texas. The atmosphere had become moderately unstable ahead of the thunderstorms, and the low level wind shear had become strong. This combination promoted the development of strong low level circulations along the leading edge of a squall line that formed. One of these circulations produced a brief tornado. Damaging wind also occurred with the squall line in west central Arkansas.

OKLAHOMA, Eastern

	05/15/20 21:15 CST		0	Flood (due to Heavy Rain)
	05/18/20 23:00 CST		0	Source: Official NWS Observations
The Poteau River near Panama rose above its flood stage of 29 feet at 10:15 pm CDT on May 15th. The river crested at 33.83 feet at 7:30 pm CDT on the 16th, resulting in moderate flooding. Agricultural lands and rural roads were flooded. The river fell below flood stage at midnight of the 19th.				
Thunderstorms developed into eastern Oklahoma during the morning of the 15th. The strongest storms produced damaging wind and a tornado across northeastern Oklahoma. Very moist air across the region, combined with slow storm motion, resulted in locally heavy rainfall and flash flooding. The storms developed slowly southward during the day, with intensification noted as they moved into southeastern Oklahoma, which had become quite unstable by early afternoon. Damaging wind occurred with strongest storms.				
A wake low developed on the north side of the southward developing thunderstorm complex during the mid afternoon. A strong pressure gradient associated with this feature resulted in strong, gusty wind developing across portions of northeastern Oklahoma. Wind gusts to near 60 mph, along with some minor damage, occurred locally.				
Widespread heavy rainfall of two to four inches across eastern Oklahoma, with amounts as high as six inches, resulted in river flooding. The Poteau River near Panama rose ten feet in just five hours, while the Verdigris River near Lenapah rose fourteen feet in fourteen hours. Moderate river flooding occurred along the Verdigris River near Lenapah, along the Neosho River near Commerce, and along the Poteau River near Panama.

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Baseball size hail damaged vehicles, homes, and businesses.				
LE FLORE COUNTY --- 1.0 S HEAVENER [34.87, -94.60]				
	05/22/20 19:32 CST		0	Hail (1.75 in)
	05/22/20 19:32 CST		0	Source: Trained Spotter
Golf ball size hail damaged vehicles and homes.				
LE FLORE COUNTY --- 2.9 E HEAVENER ARPT [34.92, -94.55], 3.5 S MONROE [34.93, -94.52]				
	05/22/20 19:55 CST		0	Tornado (EFU, L: 1.70 mi , W: 75 yd)
	05/22/20 19:59 CST		0	Source: Storm Chaser
This tornado was observed by several storm chasers. It occurred over heavily-wooded terrain that was inaccessible by road, thus a storm survey team was unable to review any damage that may have been produced by the tornado.				
LATIMER COUNTY --- 5.2 NNE DEGNAN [35.00, -95.33], 5.4 NNE DEGNAN [35.01, -95.33]				
	05/22/20 20:32 CST		0	Tornado (EFU, L: 0.30 mi , W: 50 yd)
	05/22/20 20:33 CST		0	Source: Trained Spotter
A tornado briefly developed over heavily-wooded terrain. It was witnessed by several storm spotters. A damage survey team could not access the area where the tornado likely occurred.				
LE FLORE COUNTY --- 1.8 SE TALIHINA [34.74, -95.02], 1.6 E TALIHINA [34.75, -95.02]				
	05/22/20 20:58 CST		0	Tornado (EF1, L: 0.90 mi , W: 100 yd)
	05/22/20 21:02 CST		0	Source: NWS Storm Survey
This tornado developed north of Highway 63, and east of Blagg Road, where softwood trees were snapped and uprooted. The tornado moved north-northeast, crossing Green Hill Road, where hardwood trees were uprooted, and large tree limbs were snapped. It dissipated in open country south of Highway 271. Based on this damage, maximum estimated wind in the tornado was 95 to 105 mph.				
LE FLORE COUNTY --- 4.1 WNW WHITESBORO [34.71, -94.94], 3.0 NNW WHITESBORO [34.72, -94.89]				
	05/22/20 21:05 CST		30K	Tornado (EF1, L: 3.00 mi , W: 225 yd)
	05/22/20 21:14 CST		0	Source: NWS Storm Survey
This tornado developed south of Highway 63, and west of Flag Lake Road, where trees were uprooted. It moved east-northeast damaging a home, destroying an outbuilding, and uprooting more hardwood trees on 374th Avenue, before crossing Highway 63. The tornado continued east-northeast, uprooting trees on Camp Tom Hale Road and Bohannon Creek Lane, and then dissipated in heavily-wooded terrain north and west of NF6027. Based on this damage, maximum estimated wind in the tornado was 90 to 100 mph.				
CHOCTAW COUNTY --- 0.9 E BOSWELL [34.03, -95.85]				
	05/22/20 21:15 CST		2K	Thunderstorm Wind (EG 56 kt)
	05/22/20 21:15 CST		0	Source: Public
Strong thunderstorm wind blew down a peach tree, snapped large tree limbs, and blew shingles from the roof of a home.				
LE FLORE COUNTY --- 2.5 N WHITESBORO [34.72, -94.89], 2.8 NW LENOX [34.72, -94.84]				
	05/22/20 21:15 CST		0	Tornado (EF1, L: 2.70 mi , W: 200 yd)
	05/22/20 21:22 CST		0	Source: NWS Storm Survey
This tornado developed in heavily-wooded terrain. It uprooted a few softwood trees as it crossed NF6027, and uprooted numerous softwood trees as it crossed NF6152. It was observed by a storm spotter. Based on this damage, maximum estimated wind in the tornado was 90 to 95 mph.				
HASKELL COUNTY --- 0.2 NNW ENTERPRISE [35.22, -95.38]				
	05/22/20 21:38 CST		0	Hail (1.00 in)
	05/22/20 21:38 CST		0	Source: Public
MAYES COUNTY --- 5.0 SE PRYOR [36.25, -95.26]				
	05/23/20 00:56 CST		0	Hail (1.00 in)
	05/23/20 00:56 CST		0	Source: Trained Spotter

Thunderstorms developed over western Kansas during the evening of the 21st, to the north of a low pressure system centered over the Oklahoma Panhandle. These storms moved east-southeast and organized into a squall line as they moved into eastern Oklahoma during the early morning hours of the 22nd. The strongest storms produced damaging wind. Strong to severe thunderstorms

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

redeveloped over southeastern Oklahoma during the evening near a stationary frontal boundary, as an upper level disturbance approached the region. A strongly unstable air mass across the area combined with strong deep layer wind shear to promote the development of supercell thunderstorms, several of which produced large hail up to baseball size and tornadoes.

SEQUOYAH COUNTY --- 1.9 SW BLACKGUM [35.60, -95.02], 1.6 SW BLACKGUM [35.61, -95.02]

	05/25/20 16:37 CST		0.10M	Tornado (EF0, L: 0.50 mi , W: 100 yd)
	05/25/20 16:38 CST		0	Source: NWS Storm Survey

This tornado destroyed boat storage units, blew down power poles, and snapped large tree limbs. It was observed by storm chasers. Based on the damage, maximum estimated wind in the tornado was 80 to 85 mph.

SEQUOYAH COUNTY --- 2.7 W HANSON [35.42, -94.75], 2.8 E SALLISAW ARPT [35.43, -94.75]

	05/25/20 17:06 CST		0	Thunderstorm Wind (EG 70 kt)

Strong thunderstorm wind uprooted trees.

SEQUOYAH COUNTY --- 3.0 NE SALLISAW [35.50, -94.76]

	05/25/20 17:16 CST		0	Thunderstorm Wind (EG 64 kt)
	05/25/20 17:16 CST		0	Source: NWS Storm Survey

Strong thunderstorm wind snapped large tree limbs.

ADAIR COUNTY --- 1.6 N WATTS [36.14, -94.57], 2.1 N WATTS [36.15, -94.58]

	05/25/20 18:11 CST		0	Tornado (EF1, L: 0.60 mi , W: 120 yd)
	05/25/20 18:13 CST		0	Source: NWS Storm Survey

This tornado uprooted trees and snapped large tree limbs. It was recorded by a tower camera in West Siloam Springs, and was witnessed by several storm chasers. Based on this damage, maximum estimated wind in the tornado was 85 to 90 mph.

DELAWARE COUNTY --- 2.8 ENE MOSELEY [36.22, -94.59]

	05/25/20 18:21 CST		0	Thunderstorm Wind (EG 64 kt)
	05/25/20 18:21 CST		0	Source: NWS Storm Survey

Strong thunderstorm wind snapped large tree limbs.

DELAWARE COUNTY --- 3.9 ENE ROW [36.29, -94.61]

	05/25/20 18:34 CST		0	Tornado (EF0, L: 0.10 mi , W: 50 yd)
	05/25/20 18:34 CST		0	Source: NWS Storm Survey

This tornado snapped large tree limbs, and was observed by storm chasers. Based on this damage, maximum estimated wind in the tornado was 70 to 80 mph.

DELAWARE COUNTY --- COLCORD [36.27, -94.68]

	05/25/20 18:37 CST		0	Thunderstorm Wind (EG 61 kt)
	05/25/20 18:37 CST		0	Source: Amateur Radio

Thunderstorm wind gusts were estimated to 70 mph.

DELAWARE COUNTY --- 4.7 SSW MAYSVILLE [36.34, -94.63], 4.5 SSW MAYSVILLE [36.34, -94.63]

	05/25/20 18:45 CST		0	Tornado (EF1, L: 0.30 mi , W: 75 yd)
	05/25/20 18:46 CST		0	Source: NWS Storm Survey

This tornado uprooted trees. It likely had a longer path length, but occurred in a heavily-wooded area that was mostly inaccessible by road. Based on this damage, maximum estimated wind in the tornado was 85 to 95 mph.

DELAWARE COUNTY --- 7.7 SE GROVE ARPT [36.51, -94.65], 5.8 SE GROVE ARPT [36.54, -94.65]

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

This tornado snapped large tree limbs as it crossed several county roads. Based on this damage, maximum estimated wind in the tornado was 70 to 80 mph.

LE FLORE COUNTY --- 1.8 SE SHADY PT [35.11, -94.65], 0.9 NE COAL CREEK [35.19, -94.66], 2.4 ESE SCULLYVILLE [35.24, -94.53], 0.9 SW ARKOMA [35.34, -94.46], 2.8 SSW BASHE [35.28, -94.44]

	05/26/20 00:45 CST		0	Flood (due to Heavy Rain)
	05/29/20 03:45 CST		0	Source: Official NWS Observations

The Poteau River near Panama rose above its flood stage of 29 feet at 1:45 am CDT on May 26th. The river crested at 34.56 feet at 5:45 am CDT on the 27th, resulting in moderate flooding. Agricultural lands and rural roads were flooded. The river fell below flood stage at 4:45 am CDT on the 29th.

OTTAWA COUNTY --- 11.3 WNW NORTH MIAMI [36.98, -95.07], 3.6 WSW MIAMI [36.86, -94.94], 3.5 SW OTTAWA [36.82, -94.85], 1.7 W OGEECHEE [36.77, -94.83], 2.4 NNW WYANDOTTE [36.83, -94.75], 2.9 WSW NORTH MIAMI [36.91, -94.93], 8.7 NW NORTH MIAMI [36.99, -95.01]

	05/26/20 09:45 CST		0	Flood (due to Heavy Rain)
	05/31/20 04:30 CST		0	Source: Official NWS Observations

The Neosho River near Commerce rose above its flood stage of 15 feet at 10:45 am CDT on May 26th. The river crested at 19.78 feet at 2:30 pm CDT on the 28th, resulting in moderate flooding. Low lying areas around Miami were flooded, including Riverview Park, and Highway 125 near the Fairgrounds was flooded. The river fell below flood stage at 5:30 am CDT on the 31st.

Thunderstorms developed during the afternoon of the 25th across southeastern Oklahoma, to the north of an upper level disturbance approaching the area from eastern Texas. The atmosphere had become moderately unstable ahead of the thunderstorms, and the low level wind shear had become strong. The combination of instability and wind shear promoted the development of supercell thunderstorms, which formed ahead of a squall line. The supercells produced multiple tornadoes, along with damaging wind.

These thunderstorms also produced widespread two to four inches of rain across much of eastern Oklahoma. This rainfall occurred following several days of rain, which resulted in five-day totals of four to eight inches across portions of eastern Oklahoma. Moderate flooding of the Neosho River near Commerce, and the Poteau River near Panama, resulted from this widespread heavy rain.

WAGONER COUNTY --- 1.1 S LA BARGE [35.96, -95.38], 1.2 SE LA BARGE [35.97, -95.37], 2.1 SSE LA BARGE [35.95, -95.36], 2.1 S LA BARGE [35.95, -95.39]

Storm Data and Unusual Weather Phenomena - May 2020

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Portions of several roads were flooded in and around Chouteau, including Highway 69, which was closed. Several swift water rescues were conducted in the area.				
Thunderstorms increased in coverage and intensity across eastern Oklahoma on the 27th, as an upper level disturbance moved slowly through the region. The storms moved slowly, and some moved over the same areas repeatedly, which resulted in locally heavy rainfall and localized flash flooding.				
<hr/>				
OSAGE COUNTY --- 3.4 ENE PRUE [36.25, -96.26]				
	05/28/20 17:56 CST		20K	Tornado (EF0, L: 0.10 mi , W: 50 yd)
	05/28/20 17:56 CST		0	Source: Broadcast Media

A brief tornado damaged a mobile home, destroyed a carport, damaged an outbuilding, and snapped large tree limbs. Based on this damage, maximum estimated wind in the tornado was 70 to 80 mph.

Rain showers and isolated thunderstorms developed on the back side of a deep low pressure system over Arkansas during the afternoon of the 28th. One of these thunderstorms produced a brief tornado in Osage County.
