A line of thunderstorms developed along and just ahead of a cold front that moved into the region during the morning hours of the 29th. Severe weather, including two tornadoes and damaging wind gusts, occurred over portions of eastern Oklahoma along with some flash flooding.				
<hr/>				
CREEK COUNTY --- 2.0 E SAPULPA [36.00, -96.06], 3.0 SE SAPULPA [35.97, -96.06], 1.0 SE SAPULPA [35.99, -96.09], 1.0 E SAPULPA [36.00, -96.08]				
	10/29/09 14:30 CST	0		Flood (due to Heavy Rain)
	10/30/09 08:30 CST	0		Source: Official NWS Observations
The Polecat Creek near Sapulpa rose above its flood stage of 21 feet at 3:30 p.m. CDT on October 29th. The river crested at an estimated 26.50 feet at 1:00 a.m. CDT on the 30th, resulting in moderate flooding. The river fell below flood stage at 9:30 a.m. CDT on the 30th.				
Thunderstorms that developed ahead of a cold front that moved through the area on the 29th resulted in one and a half to three inches of rain northwest of an Okemah to Tulsa to Talala line. Much of this rainfall quickly became runoff due to already saturated soils from previous rain events this month. Moderate flooding resulted along the Polecat Creek near Sapulpa.
