OKLAHOMA, Eastern

(OK-Z049) PUSHMATAHA, (OK-Z053) CHOCTAW

10/01/15 00:00 CST	0	Drought
10/20/15 00:00 CST	0	

Rainfall during the first couple weeks of October 2015 was light and scattered, resulting in amounts generally less than half an inch across the region through mid-month. These conditions resulted in worsening drought conditions across southeastern Oklahoma, with portions of Choctaw and Pushmataha Counties going into extreme drought (D3). Several widespread, heavy rain events occurred during the second half of the month, particularly across southeastern Oklahoma. Four to six inches of rain occurred across much of the area affected by the flash drought. This rainfall improved the drought in those areas into the moderate category (D1). Monetary damage estimates resulting from the drought were not available.
