Hurricane Ike made landfall near Galveston, Texas around 2 am cdt on 9/13 and moved northward across northern Texas to near Tyler and then northeastward into Arkansas near Ozark during the early morning hours of the 14th. The combination of a cold front passing into the region and the proximity of the tropical storm to the area resulted in high winds across much of northwest Arkansas. Trees, large tree limbs, and power lines were blown down. Some trees fell onto and blocked roads while some others fell on homes and businesses. Many areas were without power during the passage of the storm. Localized flash flooding occurred in northwest Arkansas as a result of Ike's rainfall.
