Severe thunderstorms developed in northeast Oklahoma during the late afternoon of April 2nd and moved across much of eastern Oklahoma during the evening hours. One tornado occurred with the storms in southern Pittsburg County. The tornado touched down briefly 6 miles north of Kiowa at 1842CST. The tornado damaged a meteorological tower at the Army Ammunitions Plant. In addition, 2 steel pans used at the plant were blown away and have not been located. The pans were estimated to weigh between 200 and 300 pounds. the tornado had a path length of 1/4 mile and a width of 75 yards, and was rated as an F-2. Thunderstorm winds gusted to 70 miles an hour at Oilton, Drumright, and Mannford. In Drumright, a cooling tower was blown off the roof of the hospital, several trees and power lines were downed, a roof was blown off a store, and there was roof damage to a number of houses. The storms also produced dime to quarter size hail at numerous locations throughout eastern Oklahoma.

Severe thunderstorms moved across northeast Oklahoma during the late evening of April 9th and the early morning of April 10th. Strong thunderstorm winds downed trees and blew the roofs off 3 barns east of Olive, and tree limbs and power lines were downed near Mannford. Thunderstorm winds gusted to 75 miles an hour 8 miles west of Sand Springs, and 60 to 70 mile an hour winds occurred 2 miles west of Pryor. Winds gusted to 60 miles an hour Oilton and Owasso. Large hail also accompanied the storms. Golfball size hail fell at Oilton and 5 miles north of Pryor, and half dollar size hail fell 8 miles west of Sand Springs and 3 miles north of Sand Springs. Dime to quarter size hail fell at several other locations in northeast Oklahoma.

Severe thunderstorms moved across northeast Oklahoma during the afternoon and evening of April 10th. The storms produced 3 tornadoes, as well as large hail and damaging winds. The first tornado was a brief touchdown at 1435CST near the west end of Skiatook Lake 5 miles east of Hominy. No damage occurred with this F-0 tornado. The second tornado touched down briefly at 1602CST on the south side of the town of Wynona. The tornado damaged 3 mobile homes and several homes had roofs blown off. An 80 foot tower was blown down onto a house. Numerous trees were downed, and the windows were blown out of a number of homes and cars. Damage in Wynona was estimated at \$100,000. The tornado was 75 yards wide, and was rated as an F-1. The third tornado touched down at 1640CST in the city of Bartlesville near U.S. Highway 75 and Adams Boulevard. The tornado was on the ground intermittently for 1.5 miles before lifting at 1643CST. The last tornado damage occurred near Madison and Tuxedo Boulevard. The tornado caused significant roof damage to the old Wal Mart store, Gans Antique Mall, and a church near Madison and Tuxedo. The roof of the antique mall was thrown onto an apartment complex, and windows were blown out of a few homes. The tornadp had a path width of 100 yards, and was rated as an F-1. The tornado caused 3 minor injuries, 2 from flying debris and 1 from being lifted 5 feet in the air and dropped. One person was knocked unconscious by baseball size hail.

Strong thunderstorm winds destroyed a porch in Cleveland, and 60 to 70 mile an hour winds in Pawnee downed trees and power lines and blew shingles off roofs. Strong thunderstorm winds heavily damaged a barn east of Pershing on State Highway 11, and a barn was also damaged in Barnsdall. Baseball size hail fell at Fairland, Bartlesville, and 2 miles west of Wann, and tennis ball size hail fell 2 miles west of Bartlesville. Golfball size hail fell at Blackburn, at Hallett, 8 miles west of Sand Springs, at Dewey, at Copan, at Wann, at Colcord, 1 mile southwest of Colcord, and at South Coffeyville. Dime to half dollar size hail fell at numerous other locations throughout northeast Oklahoma. The thunderstorms also produced very heavy rainfall which resulted in flash flooding. Many city streets in Pawhuska were covered by 6 to 8 inches of water. A county road over Hominy Creek 12 miles west of Fairfax was closed due to a bridge that was washed out, and another county road over Sand Creek northeast of Pawhuska was closed due to high water causing bridge damage. Sand Creek near Bartlesville and Coon Creek in Dewey both overflowed their banks, and State Highway 123 between Bartlesville and Dewey was closed due to high water. Cat Creek in Claremore overflowed its banks, and street flooding occurred in Chelsea.

Severe thunderstorms moved across parts of northeast Oklahoma during the late morning and afternoon of April 11th. Strong thunderstorm winds downed numerous tree limbs greater than 2 inches in diameter at Grove, and numerous trees were downed 4.5 miles north of Welch. Nickel size hail fell 4.5 miles north of Welch and at South Coffeyville, and dime size hail fell 7 miles east of Nowata. Very heavy rainfall also accompanied the storms and resulted in flash flooding. State Highway 11 near Skiatook was closed due to high water. U.S. Highway 169 between Oologah and Talala was temporarily closed due to high water. 86th Street North east of 145th East Avenue 3 miles east of Owasso had 4 to 6 inches of water over the roadway. U.S. Highway 60 3 miles east of Nowata was temporarily closed due to high water. Numerous farm roads in Craig County were also closed due to rising water.

Sequoyah County NR Sallisaw	11	1600CST	0	0	?	0	Hail (0.75)

Northeast Oklahoma OKZ054>060	10-16	1600CST- 1700CST	1	0	5		River Flooding

Major river flooding also occurred across northeast Oklahoma from April 10th through April 16th. General rainfall amounts of 2 to 5 inches occurred across northeast Oklahoma on April 10th and 11th, with isolated amounts of over 7 inches, mainly in Osage County. The resulting runoff produced significant flooding on most rivers and streams in northeast Oklahoma.

The Neosho River at Commerce was above the flood stage of 15 feet from 1900CST April 10th through 1700CST April 16th, with a crest of 25.66 feet at 0400CST April 13th. This was the second highest stage on record at Commerce. This resulted in widespread flooding along the Neosho River in Craig and Ottawa Counties. The flooding severely affected the town of Miami in Ottawa County, where numerous people were forced from their homes due to rising water.

The Spring River at Quapaw was above the flood stage of 20 feet from 1800CST April 10th through 1600CST April 14th, with a crest of 34.43 feet at 1700CST April 12th. This was the second highest stage on record at Quapaw.

The Verdigris River at Lenapah was above the flood stage of 30 feet from 0400CST April 11th through 1400CST April 14th, with a crest of 36.40 feet at 0200CST April 12th. Serious flooding resulted from the Kansas border across Nowata County to the headwaters of Lake Oologah.

The Caney River at Bartlesville was above the flood stage of 13 feet from 1600CST April 10th through 1000CST April 12th, with a crest of 16.75 feet at 1600CST April 11th. No serious flooding occurred along the Caney River near Bartlesville.

The Caney River at Ramona was above the flood stage of 26 feet from 1300CST April 11th through 0900CST April 14th, with a crest of 28.76 feet at 1700CST April 12th. The flooding affected mainly farms and rangelands, along with some rural roads. A rancher on horseback drowned just northeast of Ramona. The rancher was herding cattle from a flooded pasture when his horse stepped off a ledge into about six feet of water.

The Caney River at Collinsville was above the flood stage of 29 feet from 1500CST April 11th through 0800CST April 15th, with a crest of

33.40 feet at 1200CST April 13th. The flooding affected mainly farms and rangelands.

The Bird Creek at Sperry was above the flood stage of 21 feet from 1200CST April 11th through 1500CST April 13th, with a crest of 28.93 feet at 1400CST April 12th. Moderate to severe flooding occurred in rural and suburban areas, with minor street flooding in Sperry, Skiatook, and Turley. State Highway 11 in Sperry and Skiatook was closed due to high water.

The Bird Creek at Owasso was above the flood stage of 25 feet from April 12th through April 14th, with a crest of 32.49 feet at 1600CST April 13th. Severe flooding occurred along Bird Creek, extending from north Tulsa and Owasso to near Catoosa, reaching some city and suburban areas. There was widespread flooding of crops and pasturelands along the creek.

The Black Bear Creek at Pawnee was briefly above the flood stage of 17 feet from 1200CST April 11th through 1600CST April 11th, with a crest of 17.09 feet. No serious flooding occurred along the Black Bear Creek near Pawnee.

Washington County,15 0038CST Bartlesville	0	0							Hail (0.75)
Nowata County, 10 ENE Lenapah	15	0115CST	0	0					Hail (0.75)

Isolated severe thunderstorms developed in Washington and Nowata Counties of northeast Oklahoma during the early morning of April 15th. These storms produced dime size hail at Bartlesville and penny size hail 10 miles east northeast of Lenapah.

Osage County, Grainola	25	1610CST	0	0					Hail (1.00)
Latimer County, 5 SW Talihina-0.5 SW Talihina	25	1801CST- 4.5 220 0 0 5							Tornado (F-1)

Isolated severe thunderstorms developed in eastern Oklahoma during the late afternoon of April 25th. One tornado was spawned by the storms in southeast Oklahoma. The tornado moved into Latimer County at 1801CST 5 miles southwest of Talihina and moved northeast out of Latimer County 0.5 miles west of Talihina at 1808CST. The tornado produced an estimated \$100,000 in damage to homes and barns in Latimer County. The tornado had a path width of 220 yards and a length of 4.5 miles in Latimer County, and was rated as an F-1. A severe thunderstorm in northeast Oklahoma produced quarter size hail at Grainola.

Le Flore County 0.5 SW Talihina- 1 E Talihina	25	1808CST- 1812CST	1.5	150	0	6	6	0	Tornado (F-2)

Arkoma	25	1909CST			0	0	?	0	Hail (1.00)

A tornado continued from Latimer County into Le Flore County at 1808CST. The tornado moved into the town of Talihina at 1810CST and lifted 1 mile east of Talihina at 1812 CST. 6 persons were injured in Talihina, 2 of them seriously. The tornado destroyed 16 homes, 9 mobile homes, 5 businesses, and 1 church. 18 homes and 6 businesses sustained major damage, and 25 homes and 6 businesses sustained minor damage. Several trees were also uprooted. The tornado was on the ground for 1.5 miles in Le Flore County and was 100 to 150 yards wide. The tornado was rated F-2, and the total damage caused by the tornado was estimated to be \$2,332,350.

A second tornado touched down briefly in Fanshawe at 1840, but no damage was caused by this F-0 tornado.

A third tornado touched down on the south side of Whitesboro at 1841CST. This tornado moved northeast and lifted 1.5 miles northeast of Whitesboro at 1845CST. 1 mobile home was destroyed and numerous trees were downed by this tornado. The tornado was on the ground for 1.5

miles, was 75 yards wide, and was rated F-1.

Severe thunderstorms also produced quarter size hail at Arkoma and dime size hail at Poteau.

River Flooding

Heavy rainfall occurred in southeast Kansas on April 28th and 29th, resulting in river flooding along the Neosho and Verdigris Rivers in northeast Oklahoma. The rainfall redeveloped further south on April 29th, and flooding occurred along the Poteau River in southeast Oklahoma.

The Verdigris River at Lenapah had just reached its flood stage of 30 feet at 2359CST April 30th. the river was forecast to continue rising above flood stage into early May. Serious flooding resulted along the Verdigris River Valley from the Kansas border to the headwaters of Oologah Reservoir. State Highway 10 in Nowata County was under 8 to 10 feet of water.

The Neosho River at Commerce rose above the flood stage of 15 feet at 0700CST April 29th and was continuing to rise at 2359CST April 30th. The highest stage in April was 19.42 feet, and the river was forecast to crest in early May. Widespread serious flooding occurred along the Neosho River in Craig and Ottawa Counties, and low-lying areas in the town of Miami were flooded.

The Poteau River at Panama rose above the flood stage of 29 feet at 0800CST April 29th and was continuing to rise at 2359CST April 30th. The highest stage in April was 31.26 feet, and the river was forecast to crest in early May. Severe flooding of crops and pasturelands occurred along the river near Panama and for several miles downstream. No flooding occurred in the town of Panama.
