

WESTERN REGION TECHNICAL ATTACHMENT  
NO. 89-37  
December 29, 1989

INDEX OF 1989 TECHNICAL ATTACHMENTS

- 89-01 Jan 03 UPDATE: STORM PROJECT (STormscale Operational and Research Meteorology)
- 89-02 Jan 10 Use of Mesoscale Data in Determining the Location of Surface Fronts
- 89-03 Jan 17 Positive Cloud-to-Ground Flashes in the Vicinity of the Nevada Test Site
- 89-04 Feb 07 A Tornado in Utah ? In January ?
- 89-05 Feb 14 Comments on Western Region Technical Attachment 88-34
- 89-06 Feb 21 Temperature Verification in the Pacific Northwest
- 89-07 Feb 28 Using Profiler Data to Diagnose the Atmosphere--A Case Study
- 89-08 Mar 07 The Cold Episode Continues
- 89-09 Mar 21 Update: Operational Use of Lightning Data
- 89-10 Apr 04 The Forecaster Contribution to the Forecast Product
- 89-11 Apr 18 Preparing For AWIPS-90 Applications
- 89-12 Apr 25 Polar-Orbiting Satellite Images Available on SWIS
- 89-13 May 02 Managing Application Programs in an Era of Change
- 89-14 May 09 The Current State of Drought Severity in the Western Region
- 89-15 May 30 NGM MOS Guidance Update
- 89-16 Jun 06 Interpretation of GOES Water Vapor Imagery and Its Application to Forecasting Thunderstorms
- 89-17 Jul 05 NGM MOS Guidance II
- 89-18 Jul 11 The Poleward Boundary of Jet Stream Cirrus Shields
- 89-19 Jul 18 Improving Stratus Forecasting at San Francisco
- 89-20 Jul 25 LIVES-88 - Verification of Detection Efficiency and Accuracy of the Nevada Test Site Automatic Lightning Detection System
- 89-21 Aug 01 Another Example of a Maddox Type I Flash Flood Pattern in the Great Basin
- 89-22 Aug 08 GOES I-M Capabilities
- 89-23 Aug 15 Satellite Applications Information Note 89/1 - A Water Vapor Image Feature Related to Severe Thunderstorms
- 89-24 Aug 22 Frontal Characteristics of the Arizona Monsoon Boundary
- 89-25 Sep 05 Early February Freeze of 1989
- 89-26 Sep 12 Severe Thunderstorm Outbreak of June 15, 1989 in Idaho
- 89-27 Sep 26 Dew Point Discontinuity Initiates Severe Thunderstorms in Utah
- 89-28 Oct 03 Pacific Northwest QPF Verification Program
- 89-29 Oct 17 Heavy Fog Probabilities at the Salt Lake International Airport
- 89-30 Oct 17 The Effect of Surface Specification on RAFS Forecasts
- 89-31 Oct 24 NMC Models and Statistical Guidance Present and Future
- 89-32 Oct 24 Recent Progress and Future Plans For Numerical Weather Prediction at the National Meteorological Center
- 89-33 Nov 07 AWIPS-90 Activities - Phased Implementation of a Digital Forecast Database and Automated Product Generation
- 89-34 Nov 14 Instability Bursts and Mesoscale Convective System Development and Propagation
- 89-35 Dec 05 Some Differences Between the NMC/ECMWF/UKMO Models and What it Means to the NWS Forecaster
- 89-36 Dec 12 A Heavy Snow Event Associated With Jet Streak Interaction
- 89-37 Dec 29 Index of 1989 Technical Attachments
